

RACRETE

CONCRETE WALL SURFACES

ABOUT US

Racrete studio is a design, research & development lab facilitating the creation of unique concrete decor, bespoke 3D tile designs while offering customised colours, patterns and style to match individual tastes.

We bring your architectural dreams to life in our state of the art concrete manufacturing facility based in Bangalore.

Our aim is to work in close cooperation with designers and architects to design spaces that are unique to each client with our wall surfaces and decor.

HANDMADE IN INDIA

All our products are hand crafted with meticulous precision.

We focus on attention to detail to achieve artisanal excellence in each of our pieces, which are unique & authentic. Our manufacturing process is sustainable & ethical with zero emission and use of very less water unlike traditional stones like marble & granite, which makes it a green building material.

RACRETE

ABOUT OUR MATERIAL

The nature of concrete as a material has always been very inspiring as it is poured in a liquid state, and takes its ultimate form as it cures. There is poetry in a material that finds its form as it changes phases from liquid to a solid state.

Our material (UHPC) is a specialised type of concrete that exhibits enhanced durability, strength, and workability compared to traditional concrete mixes giving our products an Industry Leading finish.

UHPC involves the careful selection of high-quality raw materials, including high-performance cement, aggregates, pigments, glass fibres and supplementary cementitious materials, to achieve the desired finish and strength.

RACRETE

STAIN & WATER-REPELLENT TREATMENT

Our products are treated with a double coat of penetrating sealers in temperature controlled chambers. This makes our concrete 3D tiles and panles UV safe, water and stain resistant hence making it suitable for use in both indoor and outdoor areas. These coatings when applied to concrete surfaces, protect them from various elements and enhance their durability.

WALL PANELS

NATURAL

These wall panels are simple, minimal and timeless. Its natural texture is inspired by exposed concrete walls which have been used for generations. The subtle mottling tones and shade variations give these panels a raw authentic look and our signature textured button adds a touch of elegance to these panels.

Technical Specifications :

Available Sizes :

- 2 Ft. x 2 Ft.
- 18 inch x 18 inch
- 4 Ft. x 1 Ft.
- 3 Ft. x 1 Ft.

Thickness : 12mm

Note : Sizes and colour can be customised as per your requirement. Mix and Match different sizes and colours to create a unique look.

RACRETE

DISTRESSED

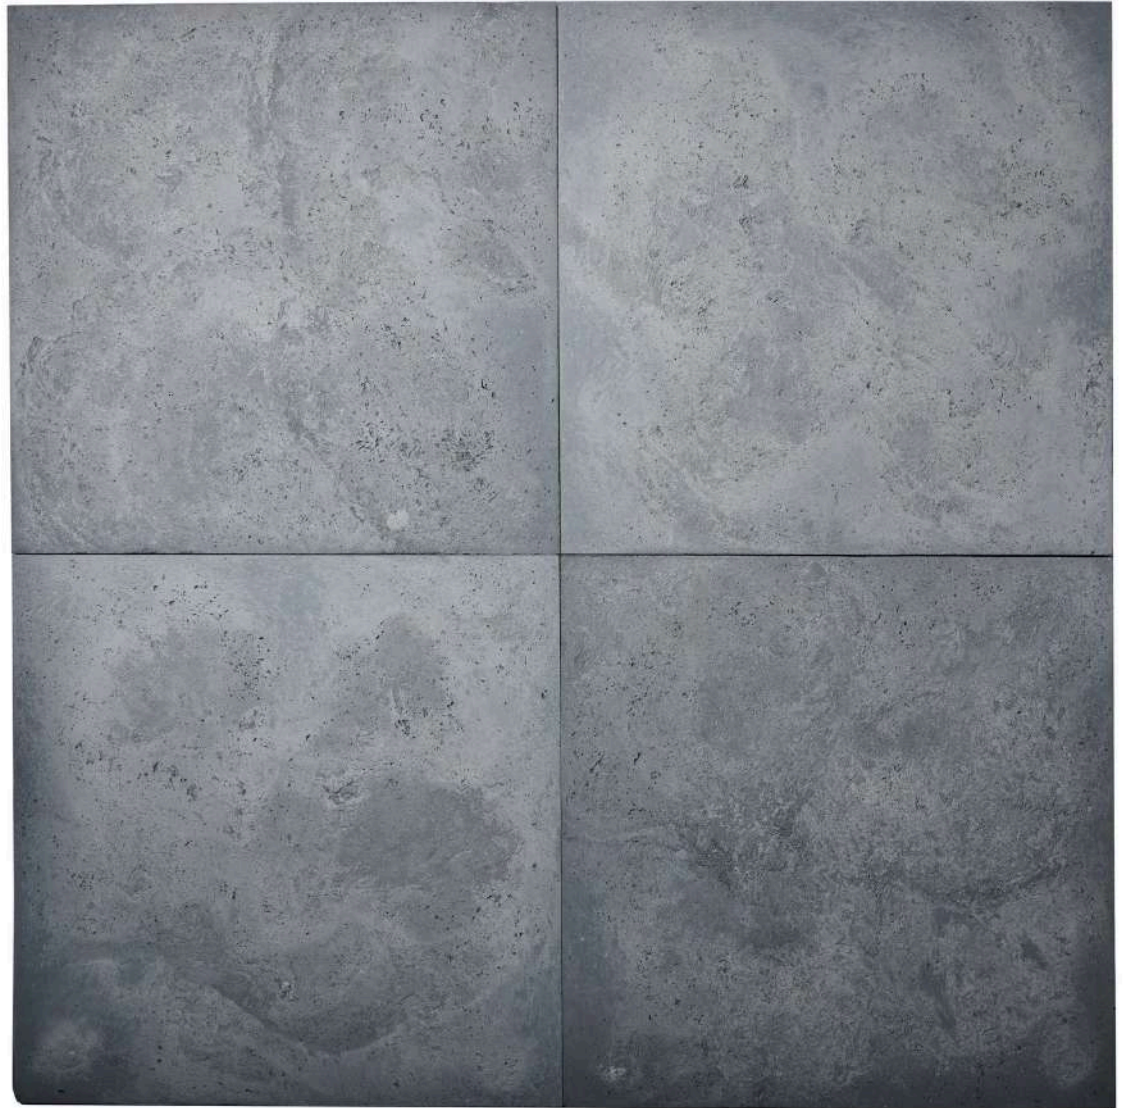

Add a rustic look to any space with these raw unfinished concrete panels. The porous texture and deliberate pin holes of various sizes make these walls stand out of the rest. Create breath taking walls by combining different size and thickness of these panels to create unique one of a kind installations.

Technical Specifications :

Available Sizes :

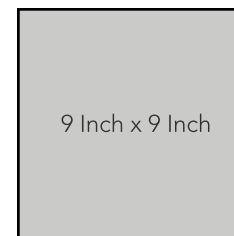

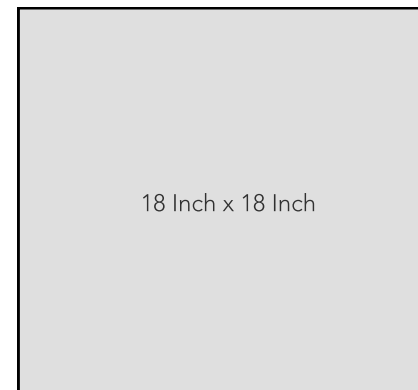

- 2 Ft. x 2 Ft.
- 18 inch x 18 inch
- 4 Ft. x 1 Ft.
- 3 Ft. x 1 Ft.

Thickness : 12mm

Note : Sizes and colour can be customised as per your requirement. Mix and Match different sizes and colours to create a unique look.

MIX & MATCH

Use different sizes and thickness variations to bring out the best of these panels.

The changing shadows on the wall due to variations make it look alive all through the day.

Thickness Options :8mm, 14mm, 20mm & 26mm.

LAVA

Deliberate pin holes infused on these panels gives it a rigid unrefined look which adds layers to any space. Subtle textures on these panels add an inviting sense of touch to the space making walls look classy and stunning.

Technical Specifications :

Available Sizes :

- 2 Ft. x 2 Ft.
- 18 inch x 18 inch
- 4 Ft. x 1 Ft.
- 3 Ft. x 1 Ft.

Thickness : 12mm

Note : Sizes and colour can be customised as per your requirement. Mix and Match different sizes and colours to create a unique look.

RACRETE

METAL INLAY

These sophisticated panels combine the durability of concrete with the aesthetic appeal of metal inlay. The little shine from the metal inlays make these panels pop and visually very attractive. Simple yet elegant making it suitable for any space needing an upscale appearance.

These panels are a class apart.

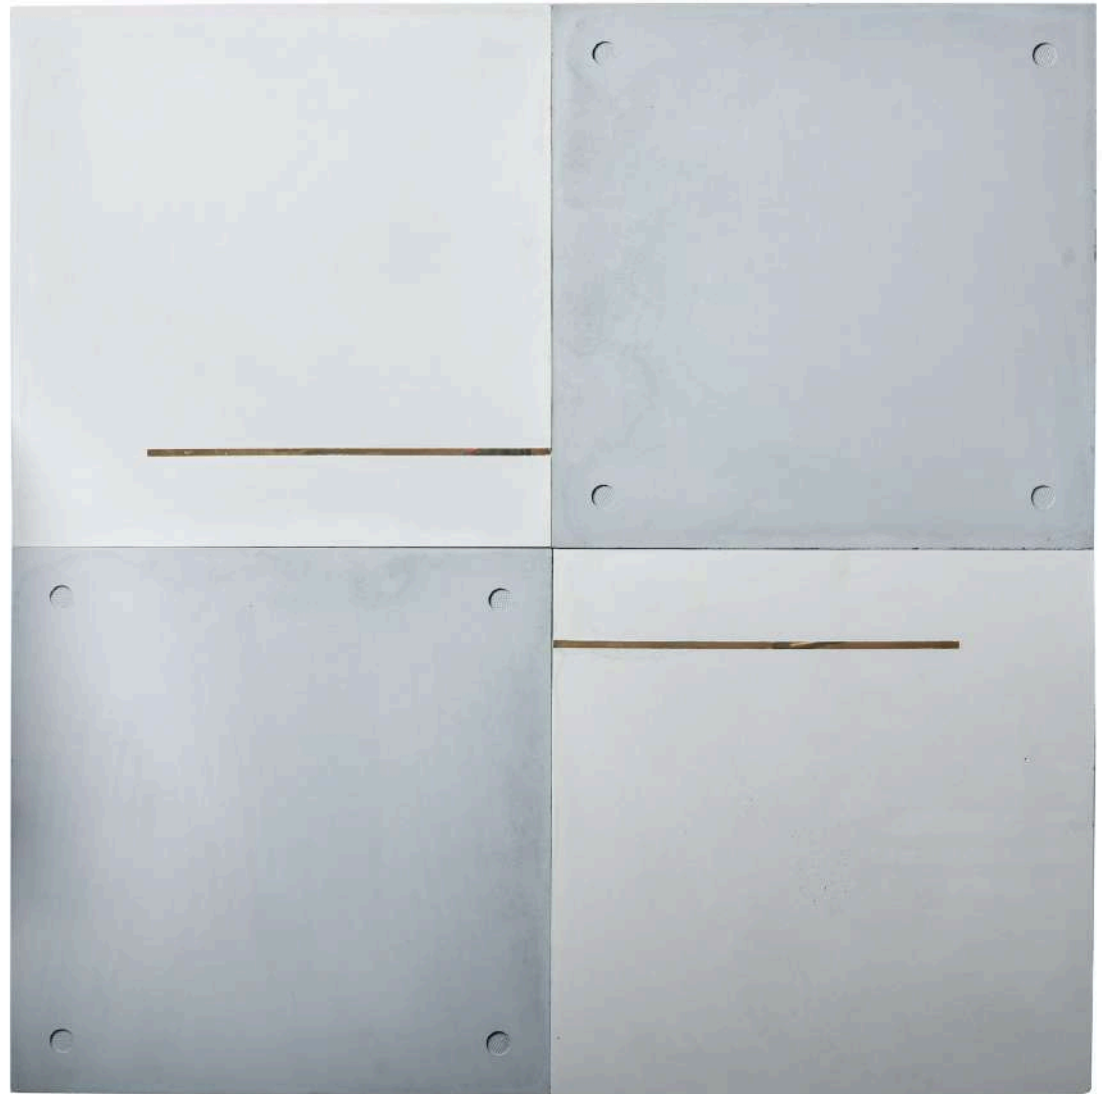

Technical Specifications :

Available Sizes :

- 2 Ft. x 2 Ft.
- 18 inch x 18 inch
- 4 Ft. x 1 Ft.
- 3 Ft. x 1 Ft.

Thickness : 12mm

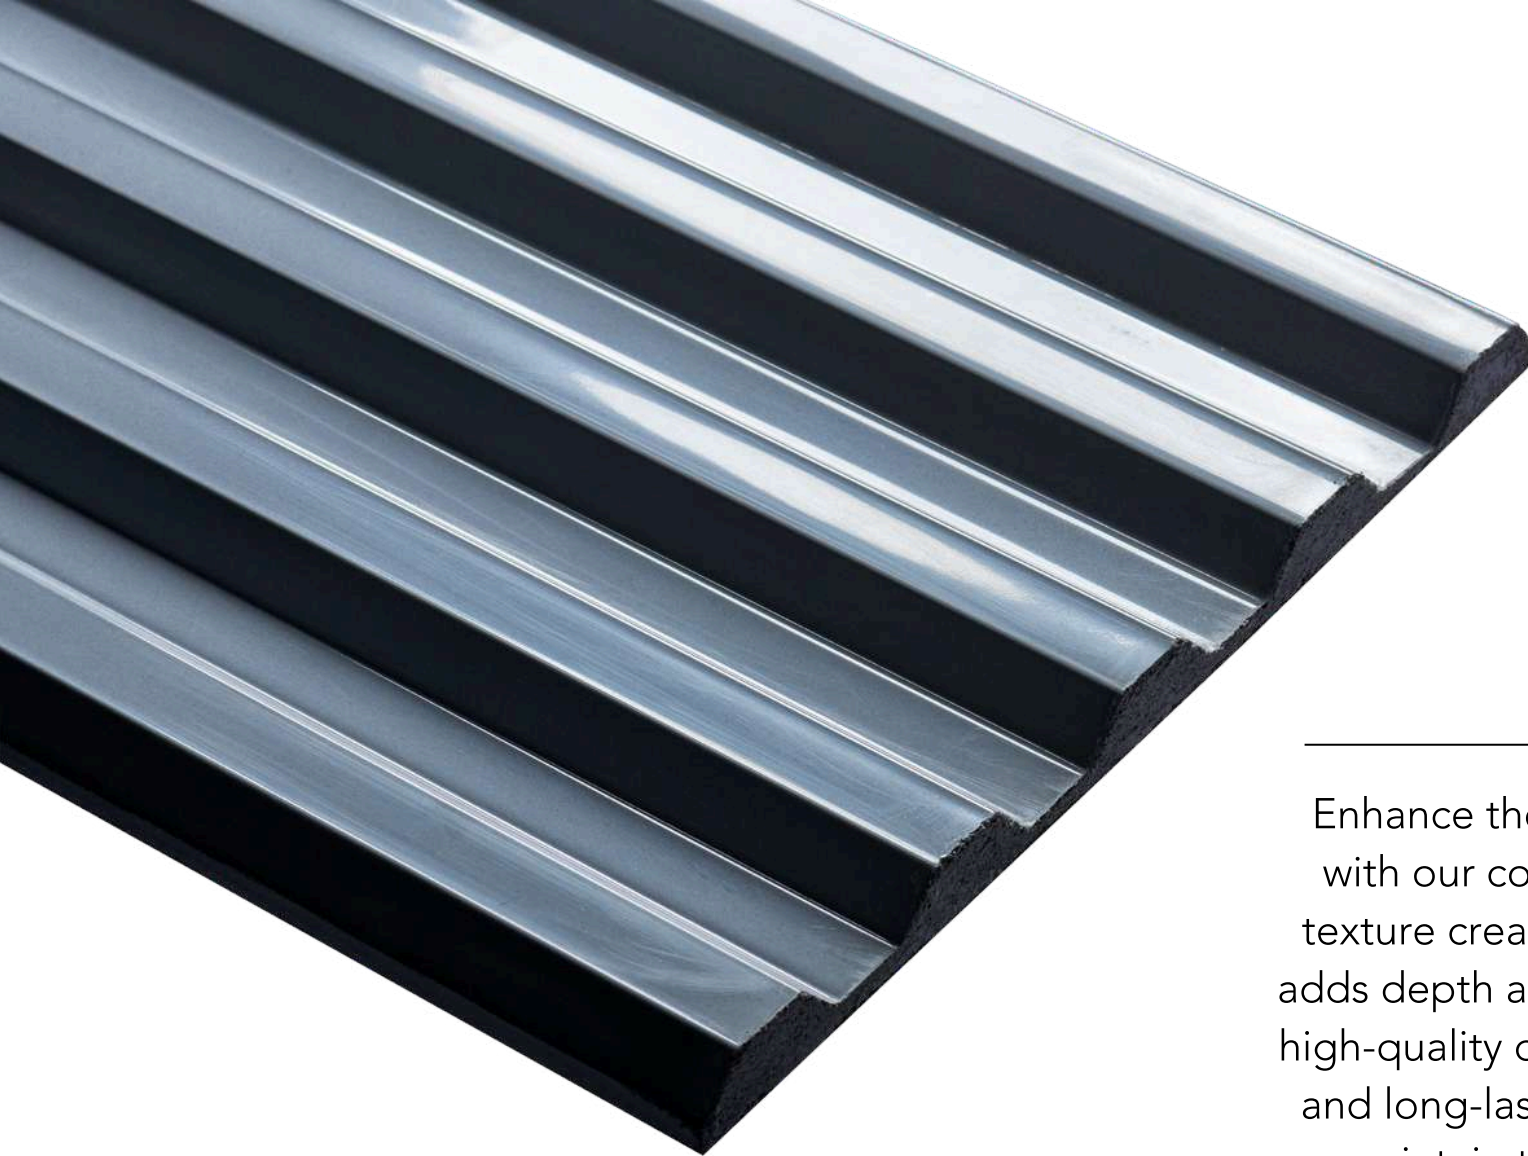

Note : Sizes and colour can be customised as per your requirement. Mix and Match different sizes and colours to create a unique look.

RACRETE

FLUTE

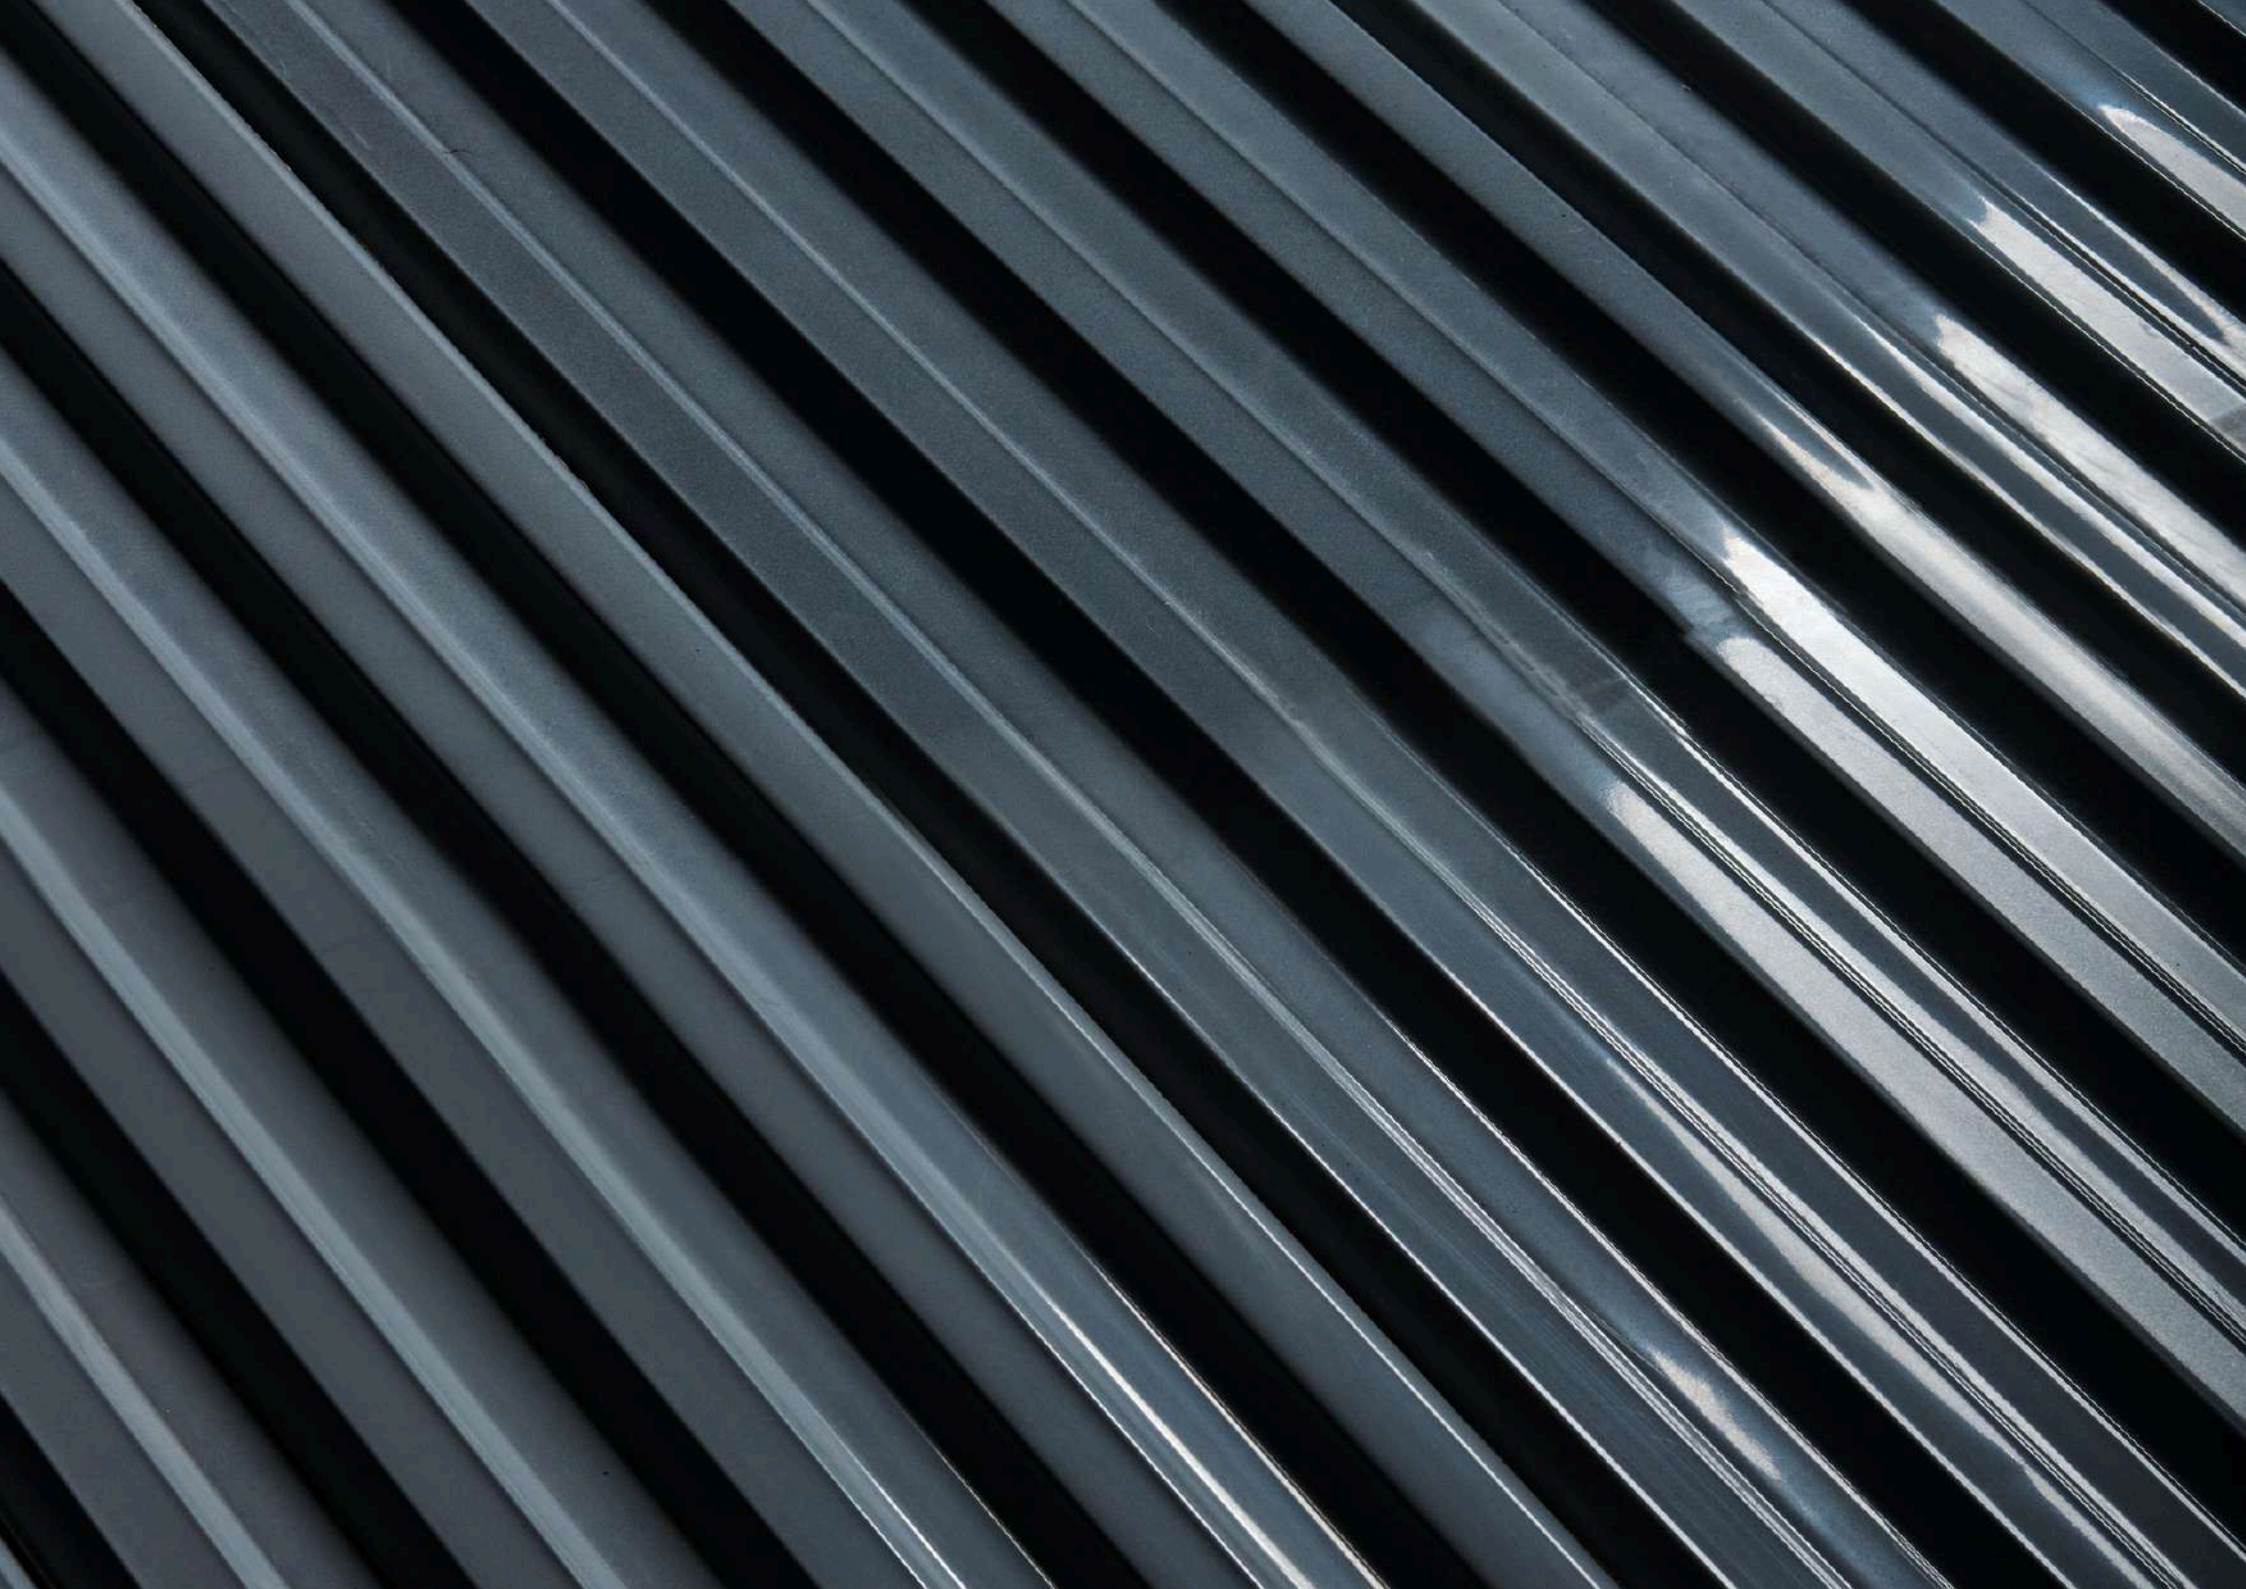

Enhance the aesthetic appeal of your space with our concrete fluted panels. The fluted texture creates a visually striking pattern that adds depth and dimension to walls. Made from high-quality concrete, these panels are durable and long-lasting, ensuring that your walls will maintain their beauty for years to come.

Technical Specifications :

Available Size : 1219 mm x 355 mm

Thickness : 30mm

PEEL - BEND

With a subtle deviation from the regular tile form our bend panels transforms spaces into a captivating visual experience. These wall panels are intentionally designed with a gentle bend to make it look like peels and by adding warm lights behind the bends makes spaces intriguingly stunning. This work of art is a revolution in wall surfaces.

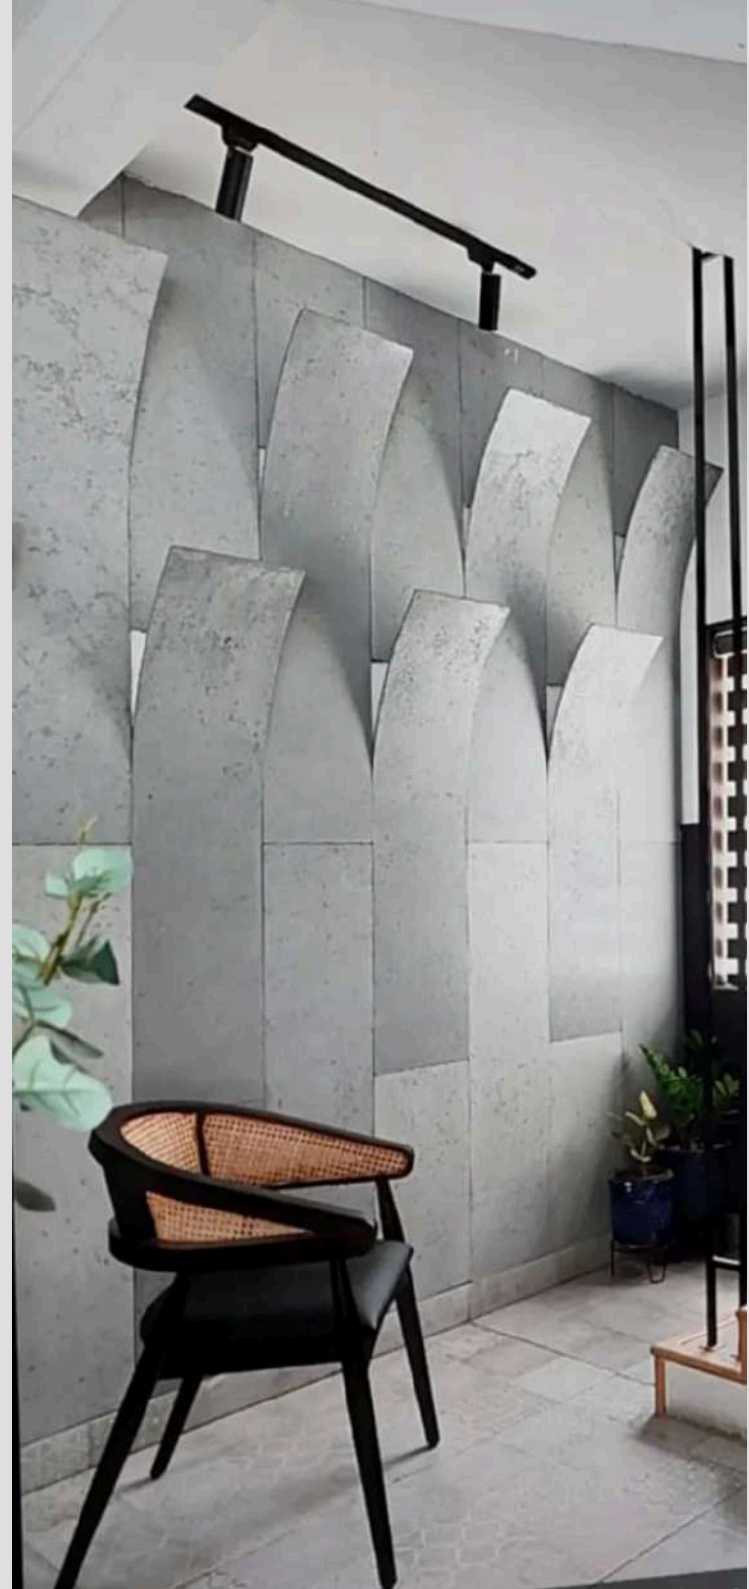

Technical Specifications :

Available Sizes :

- 4 Ft. x 1 Ft.
- 3 Ft. x 1 Ft.

Thickness : 12mm

BULGE - BEND

Another variation of our revolutionary bend panel is the Bulge. It looks like a hump in the wall and adds intriguing 3D elements to plain walls. Redefine spaces and add a touch of modern and minimal art to your walls. When paired with lights beneath the humps, these installations can elevate spaces visually in any commercial or residential setting making walls truly come alive.

Technical Specifications :

Available Size : 4 Ft. x 1 Ft.

Thickness : 12mm

3D WALL TILES

HIVE

HIVE incorporates tactile 3D elements for bold accent walls. Balancing style and innovation for luxurious commercial spaces as well as the modern home.

Each tile in the series works as well independently as it does in multi tile combinations and maintains its visual appeal even in random configurations.

These concrete tiles are a statement in modern tile design and leaves room for limitless interpretations mixing and matching various designs made from our finest material

Coverage Area :

1 Sq. Ft. = ~ 6.2 tiles

Dimensions :

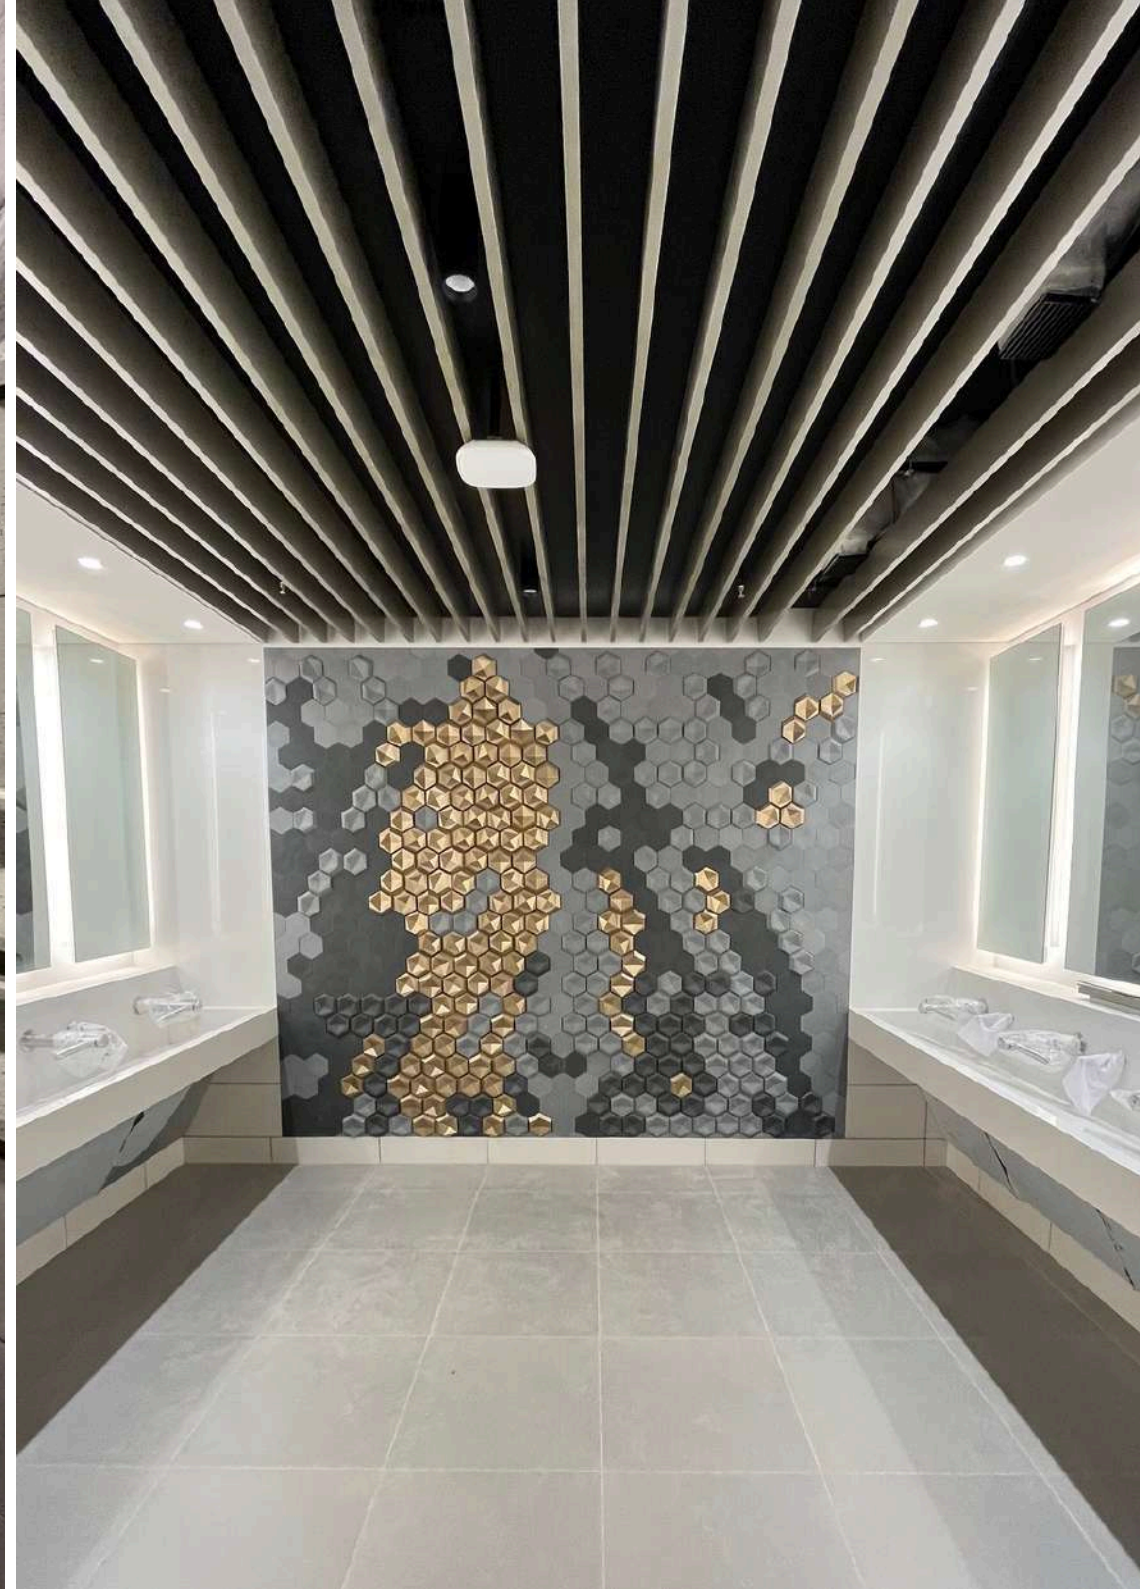

3D Tile : 150 mm x 130 mm x 25 mm (LBH)

Flat Tile : 150 mm x 130 mm x 11 mm (LBH)

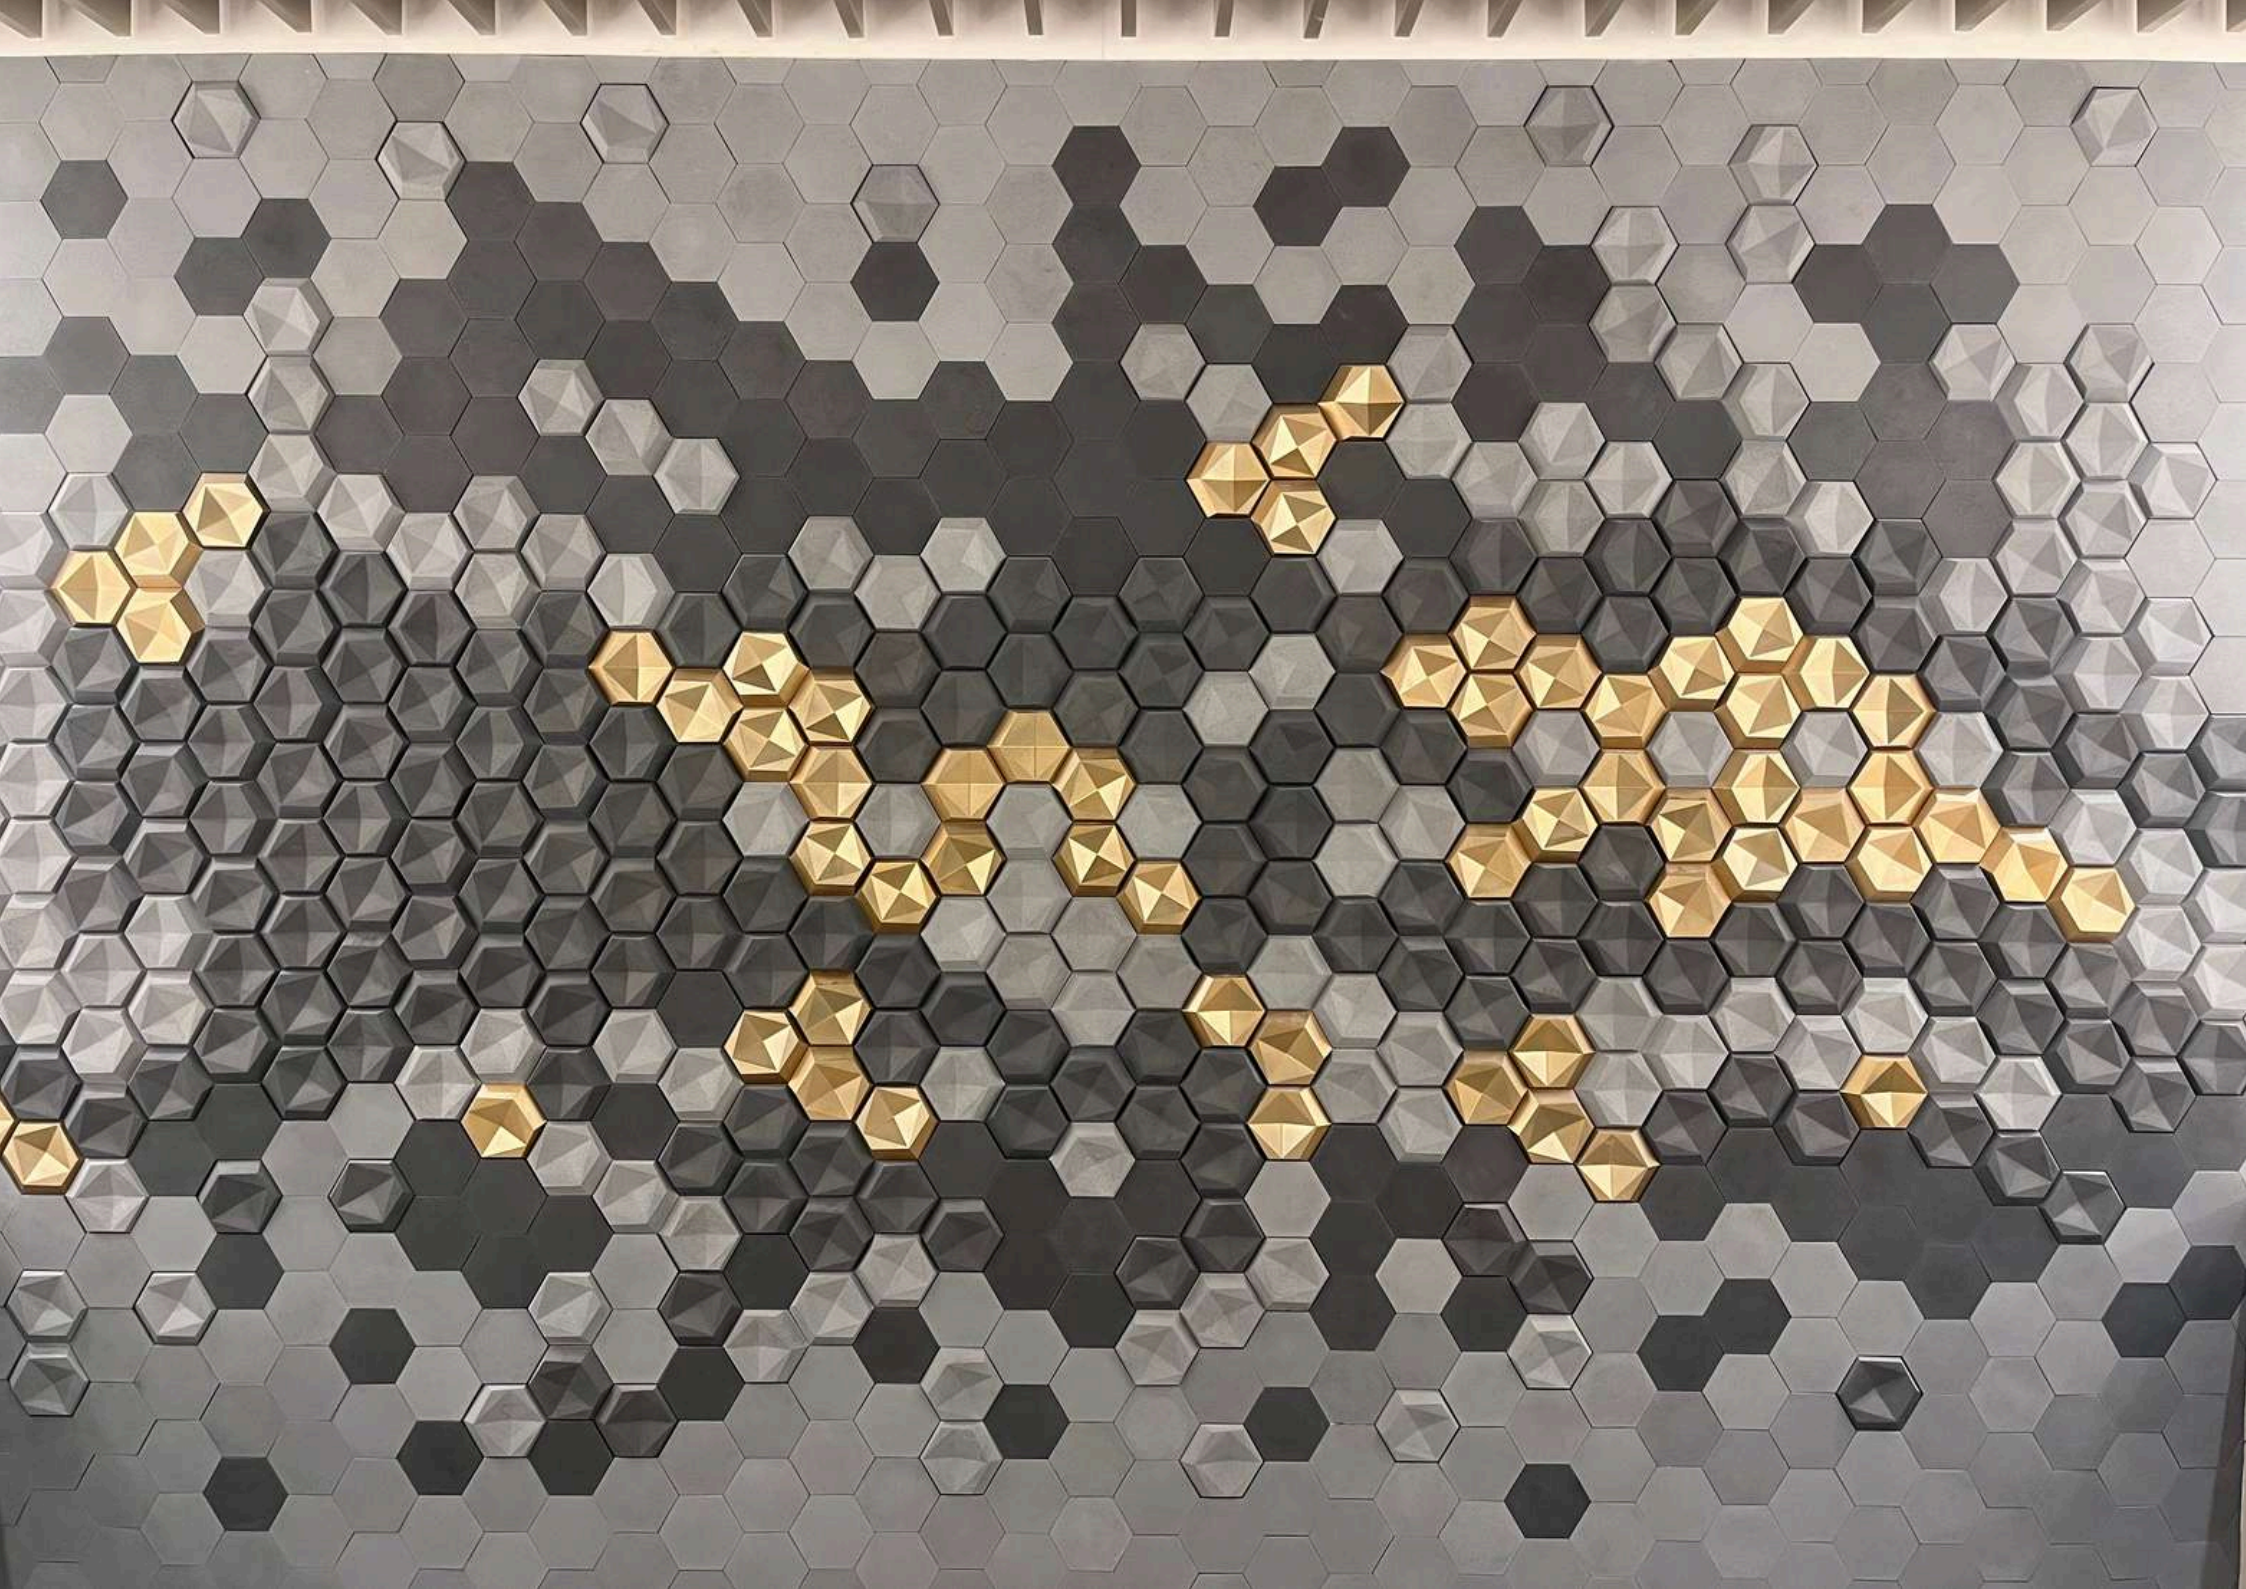

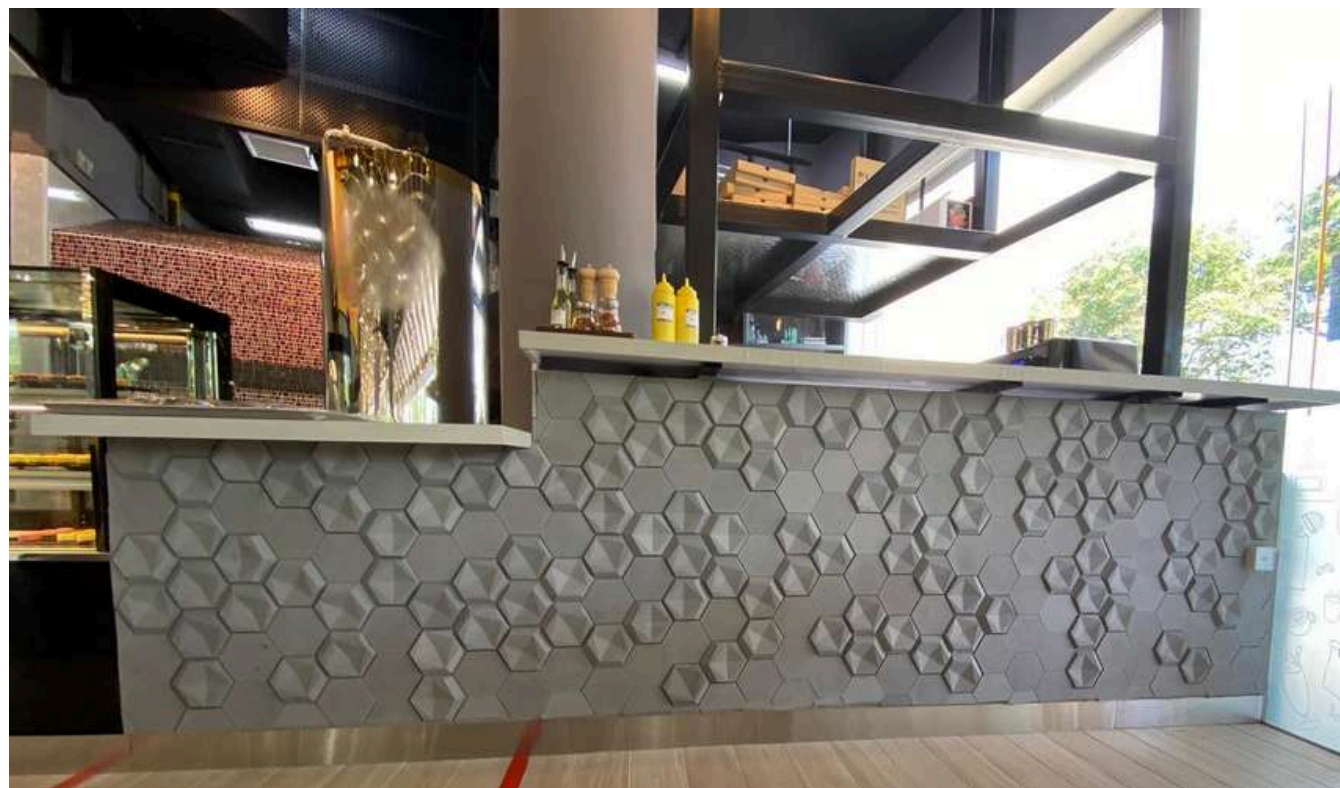

RACRETE

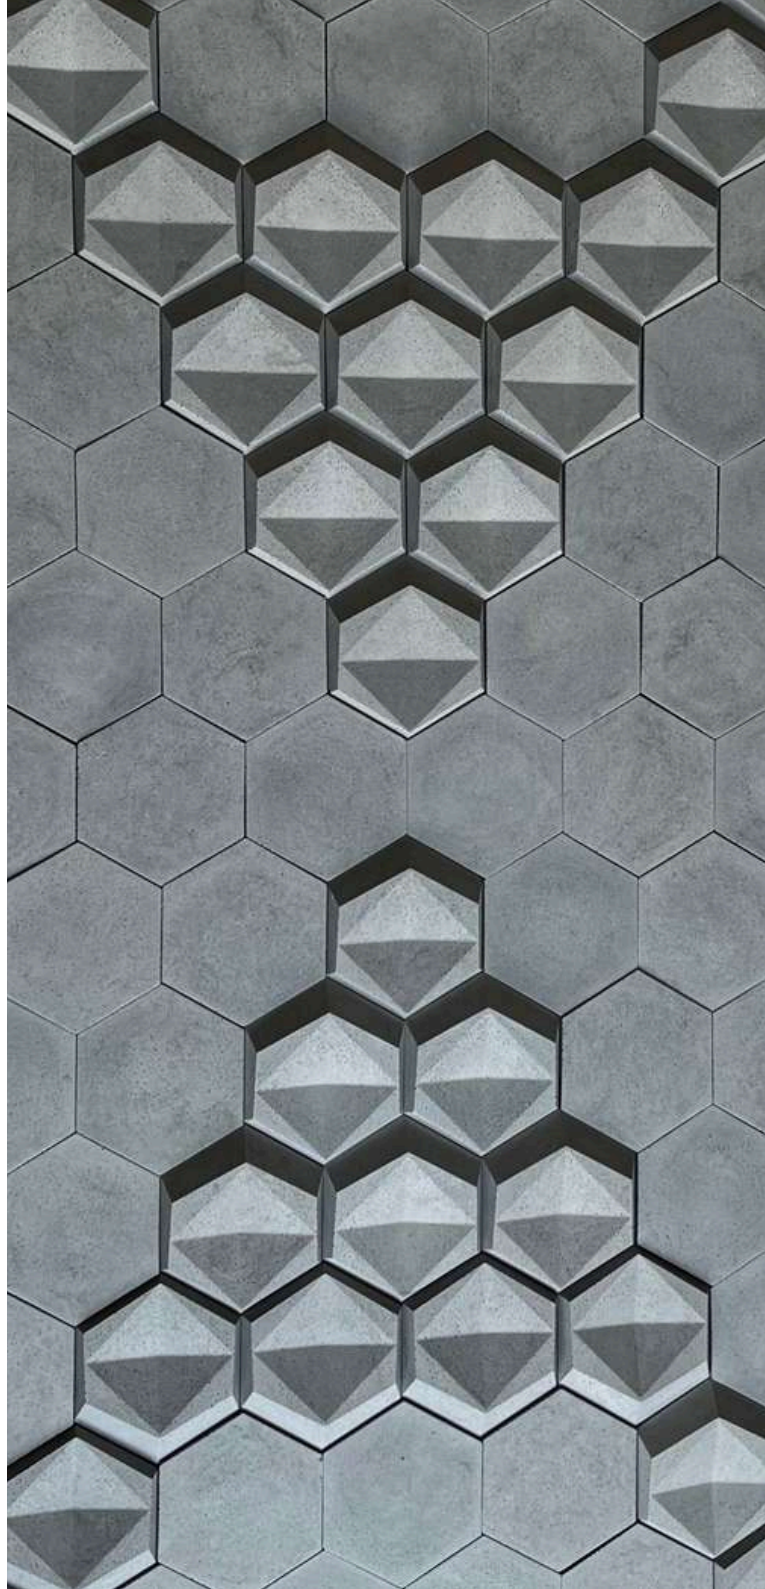

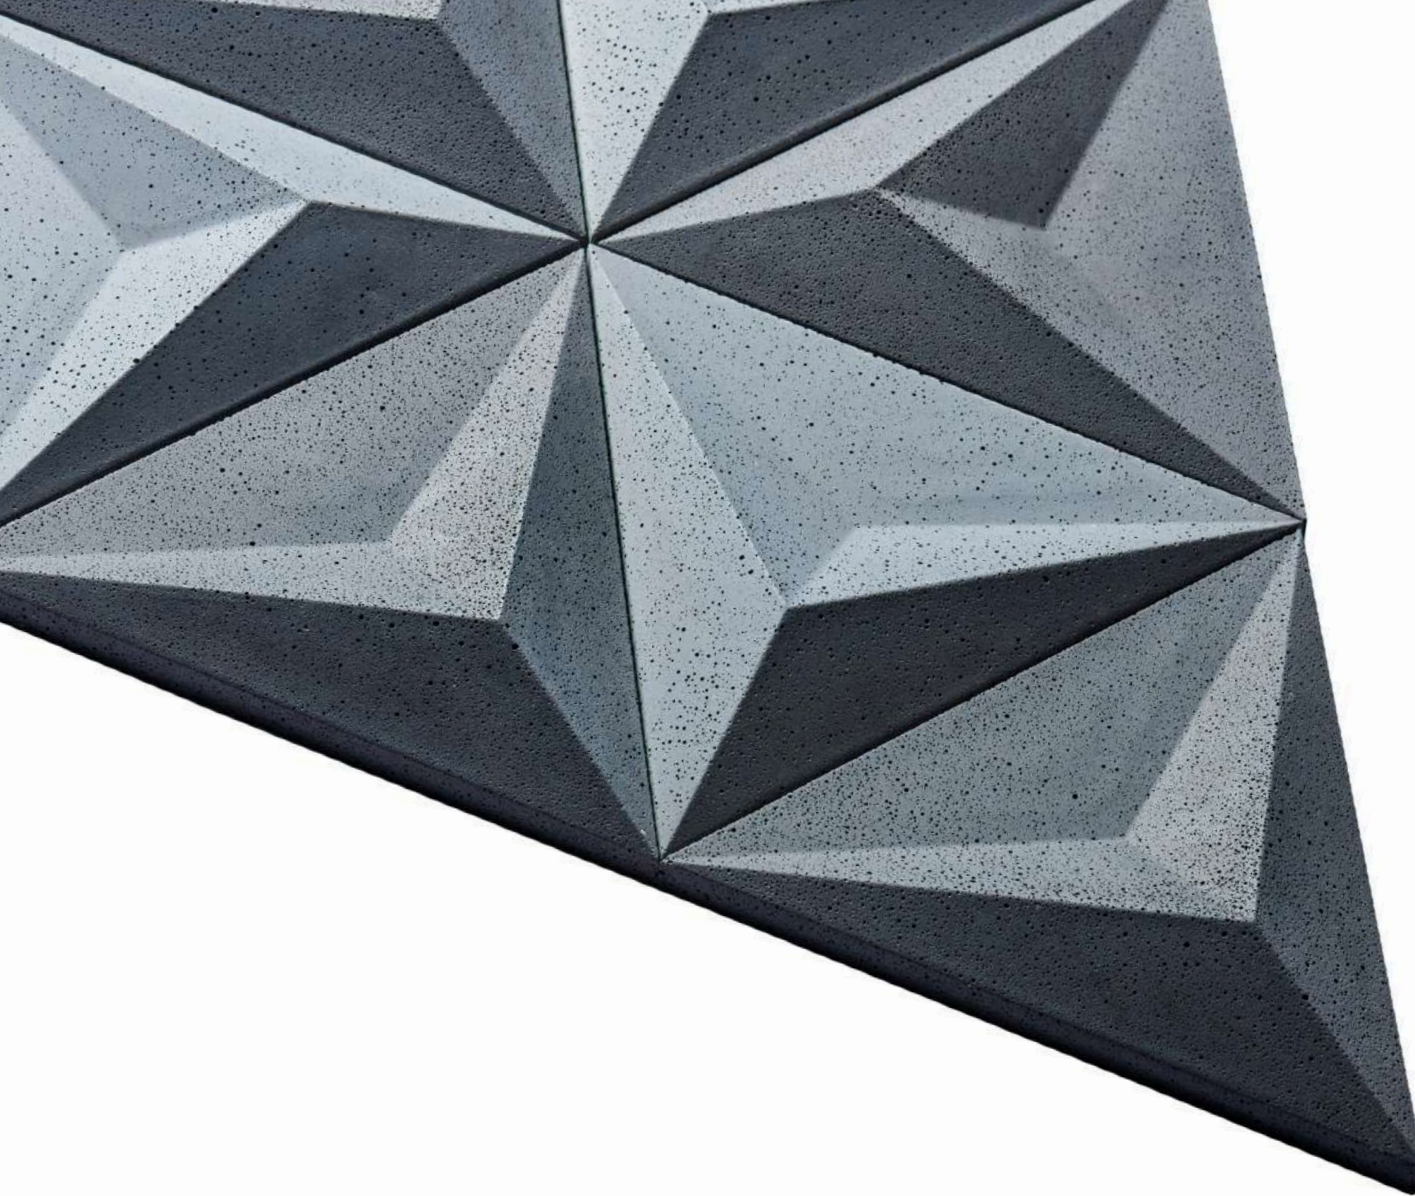

TRE

TRE's magnetic visual appeal is the result of precisely rendered angular contours that harness the beauty of symmetry, as well as the dynamic interplay of depth, light and shadow.

Add structure to smooth walls on interior or exterior surfaces, covering walls either partially or entirely to create visually stunning spaces.

Coverage Area :

1 Sq. Ft. = ~ 4.8 tiles

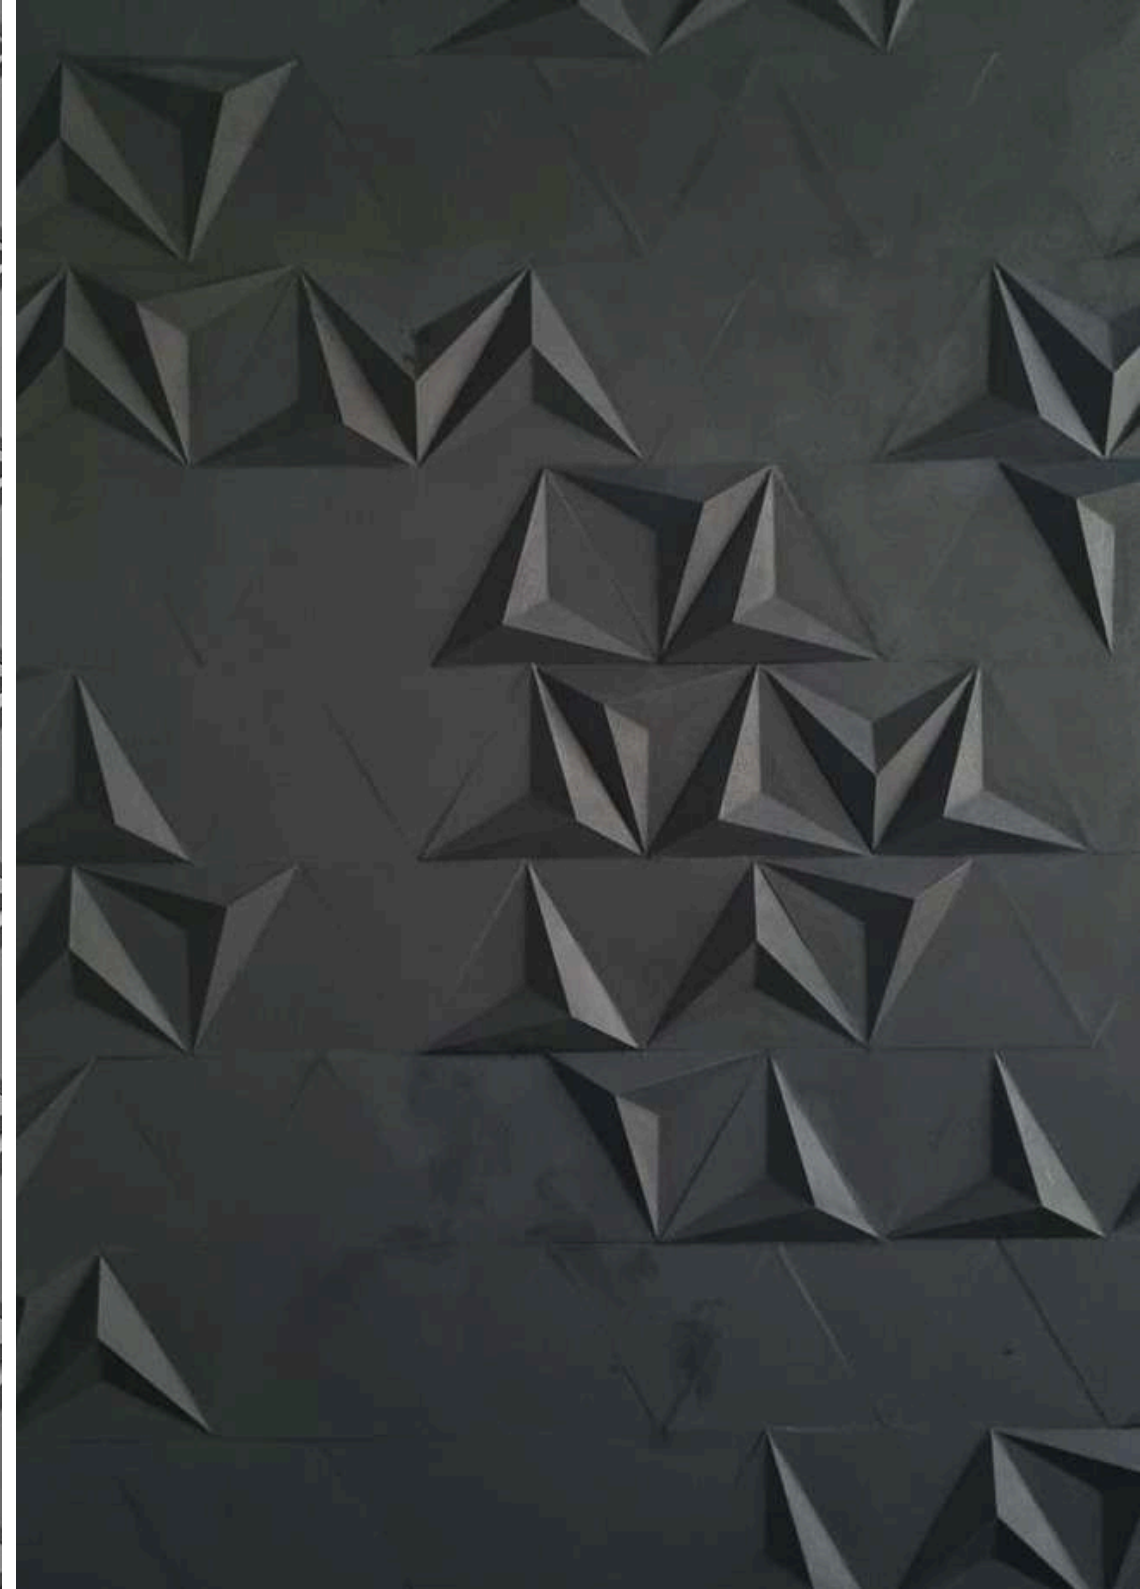

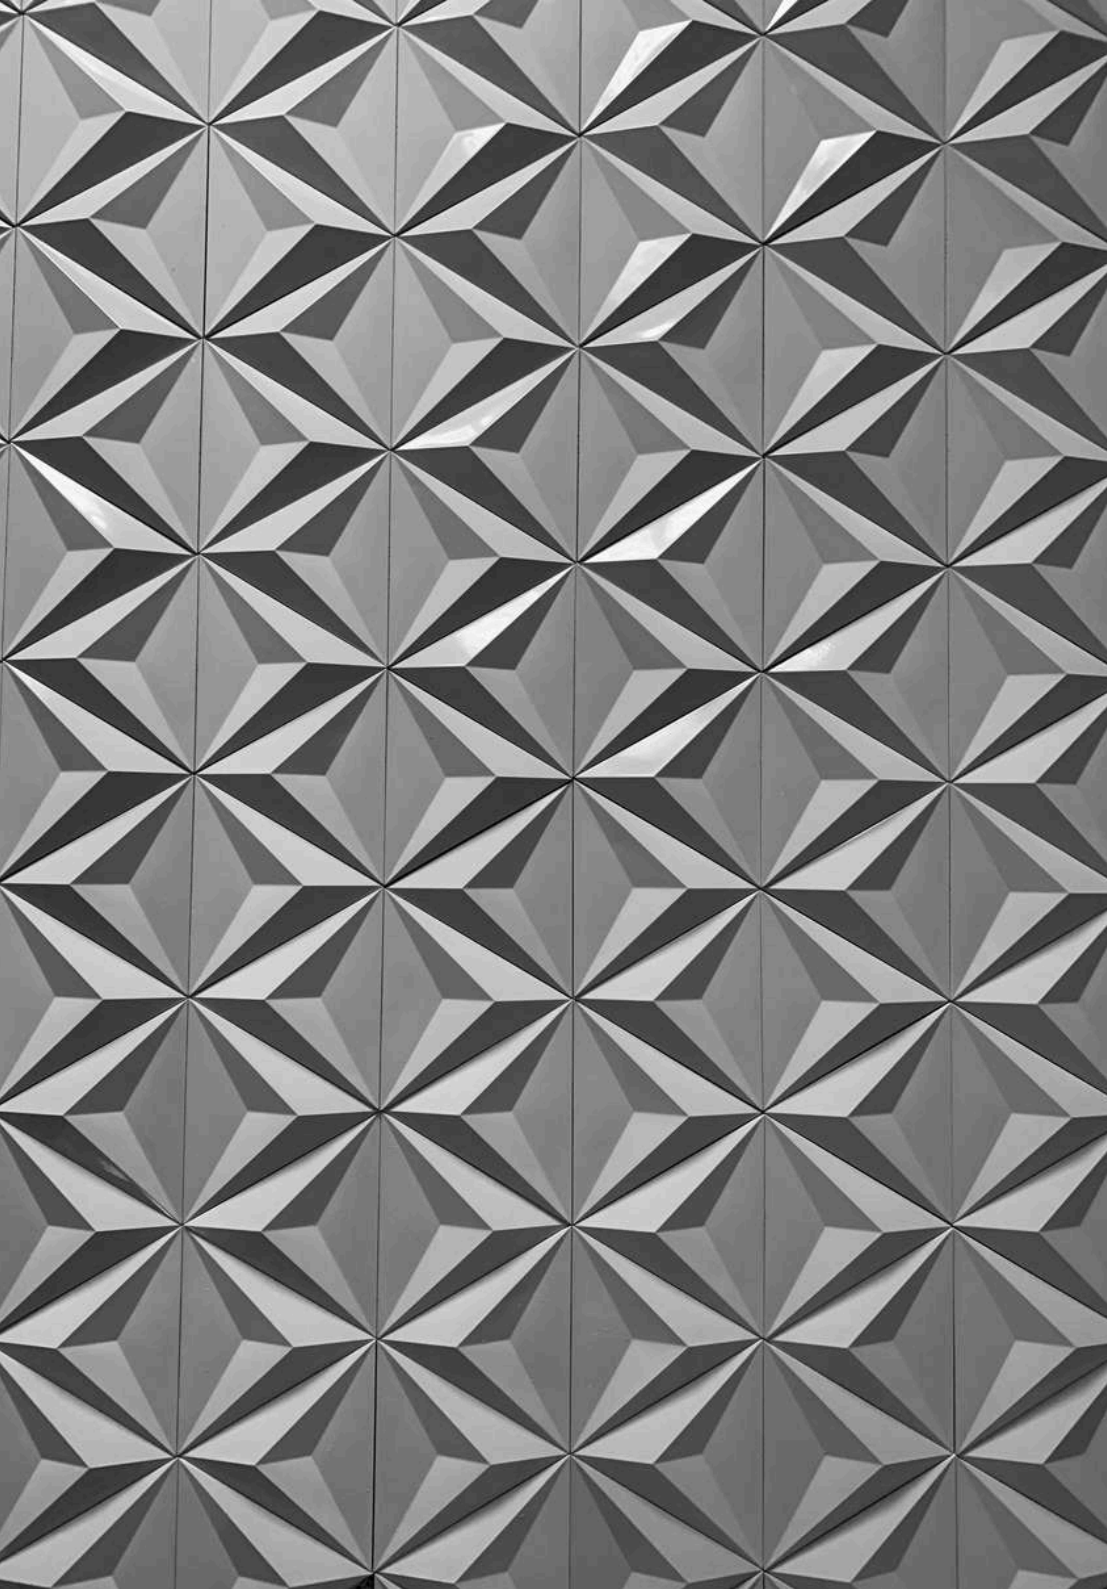

Dimensions :

3D Tile : 184 mm x 213 mm x 30 mm (LBH)

Flat Tile : 184 mm x 213 mm x 10 mm (LBH)

IF THESE
WALLS COULD
SPEAK

SPECKA

The unique combination of linear hexagon shape and three-dimensional texture adds depth and dimension to your walls, transforming them into a captivating focal point. Elevate your interior decor with these versatile and visually stunning tiles, offering endless possibilities for creating a truly personalized and stylish ambiance.

Coverage Area :

1 Sq. Ft. = ~ 3.5 tiles

Dimensions :

3D Tile : 298 mm x 131 mm x 25 mm (LBH)

Flat Tile : 298 mm x 131 mm x 10 mm (LBH)

RACRETE

QUADRO

These 3D Diamond shaped tiles are not only visually appealing but also durable and long-lasting, ensuring that your walls will remain stylish for years to come. Transform your space with these unique and versatile tiles, adding a touch of elegance and sophistication to any room. Mixing and matching 3D with flat tiles to bring out the three dimensional effect on any wall surface.

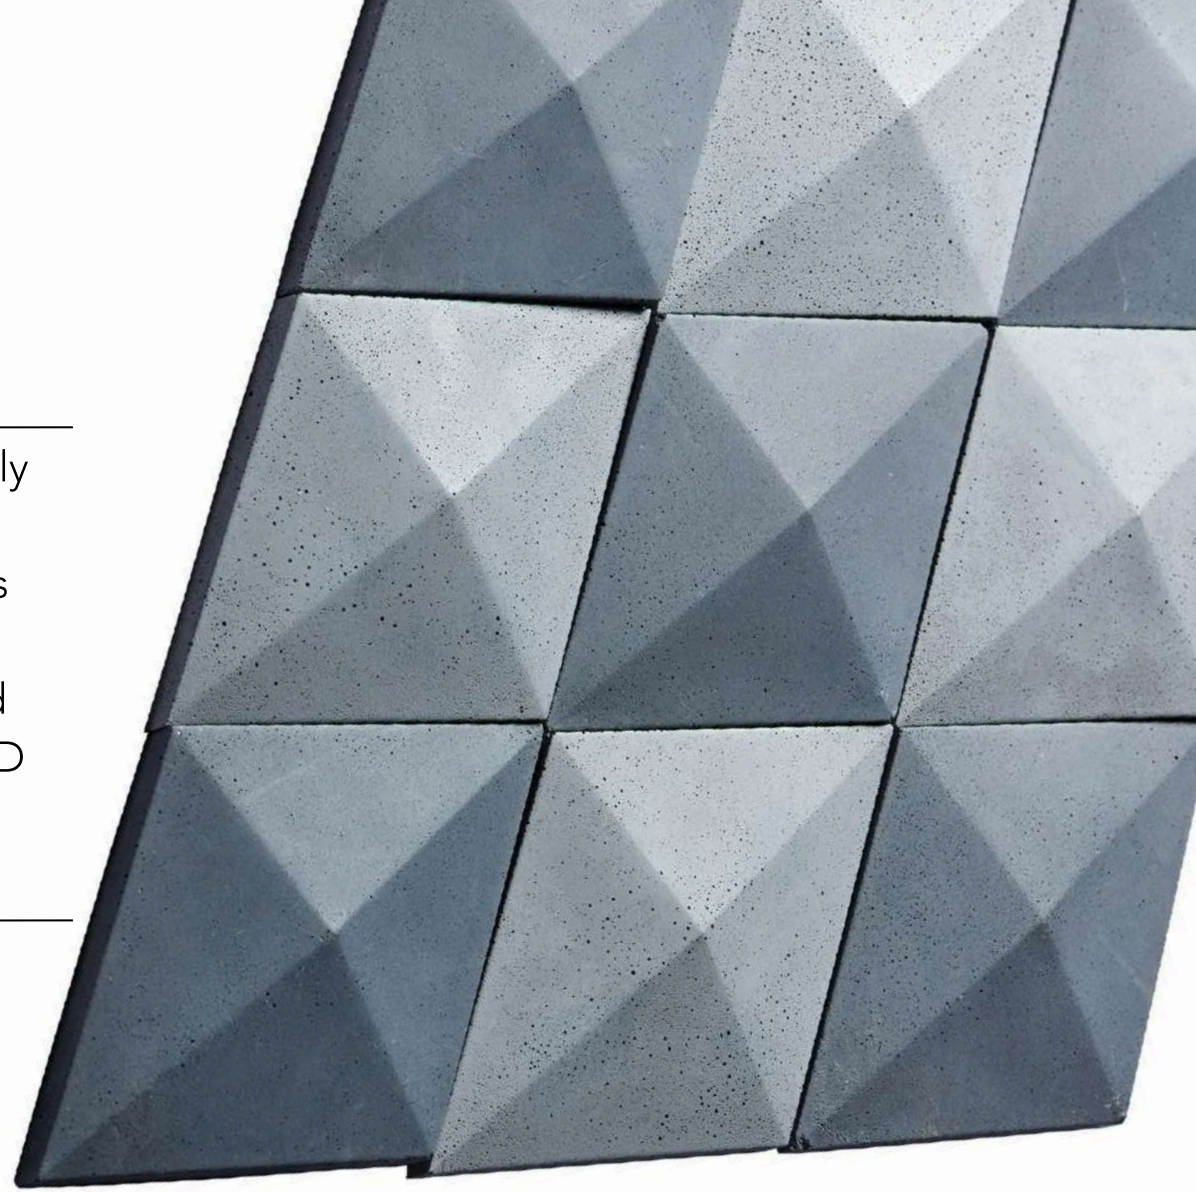

Coverage Area :

1 Sq. Ft. = ~ 6 tiles

Dimensions :

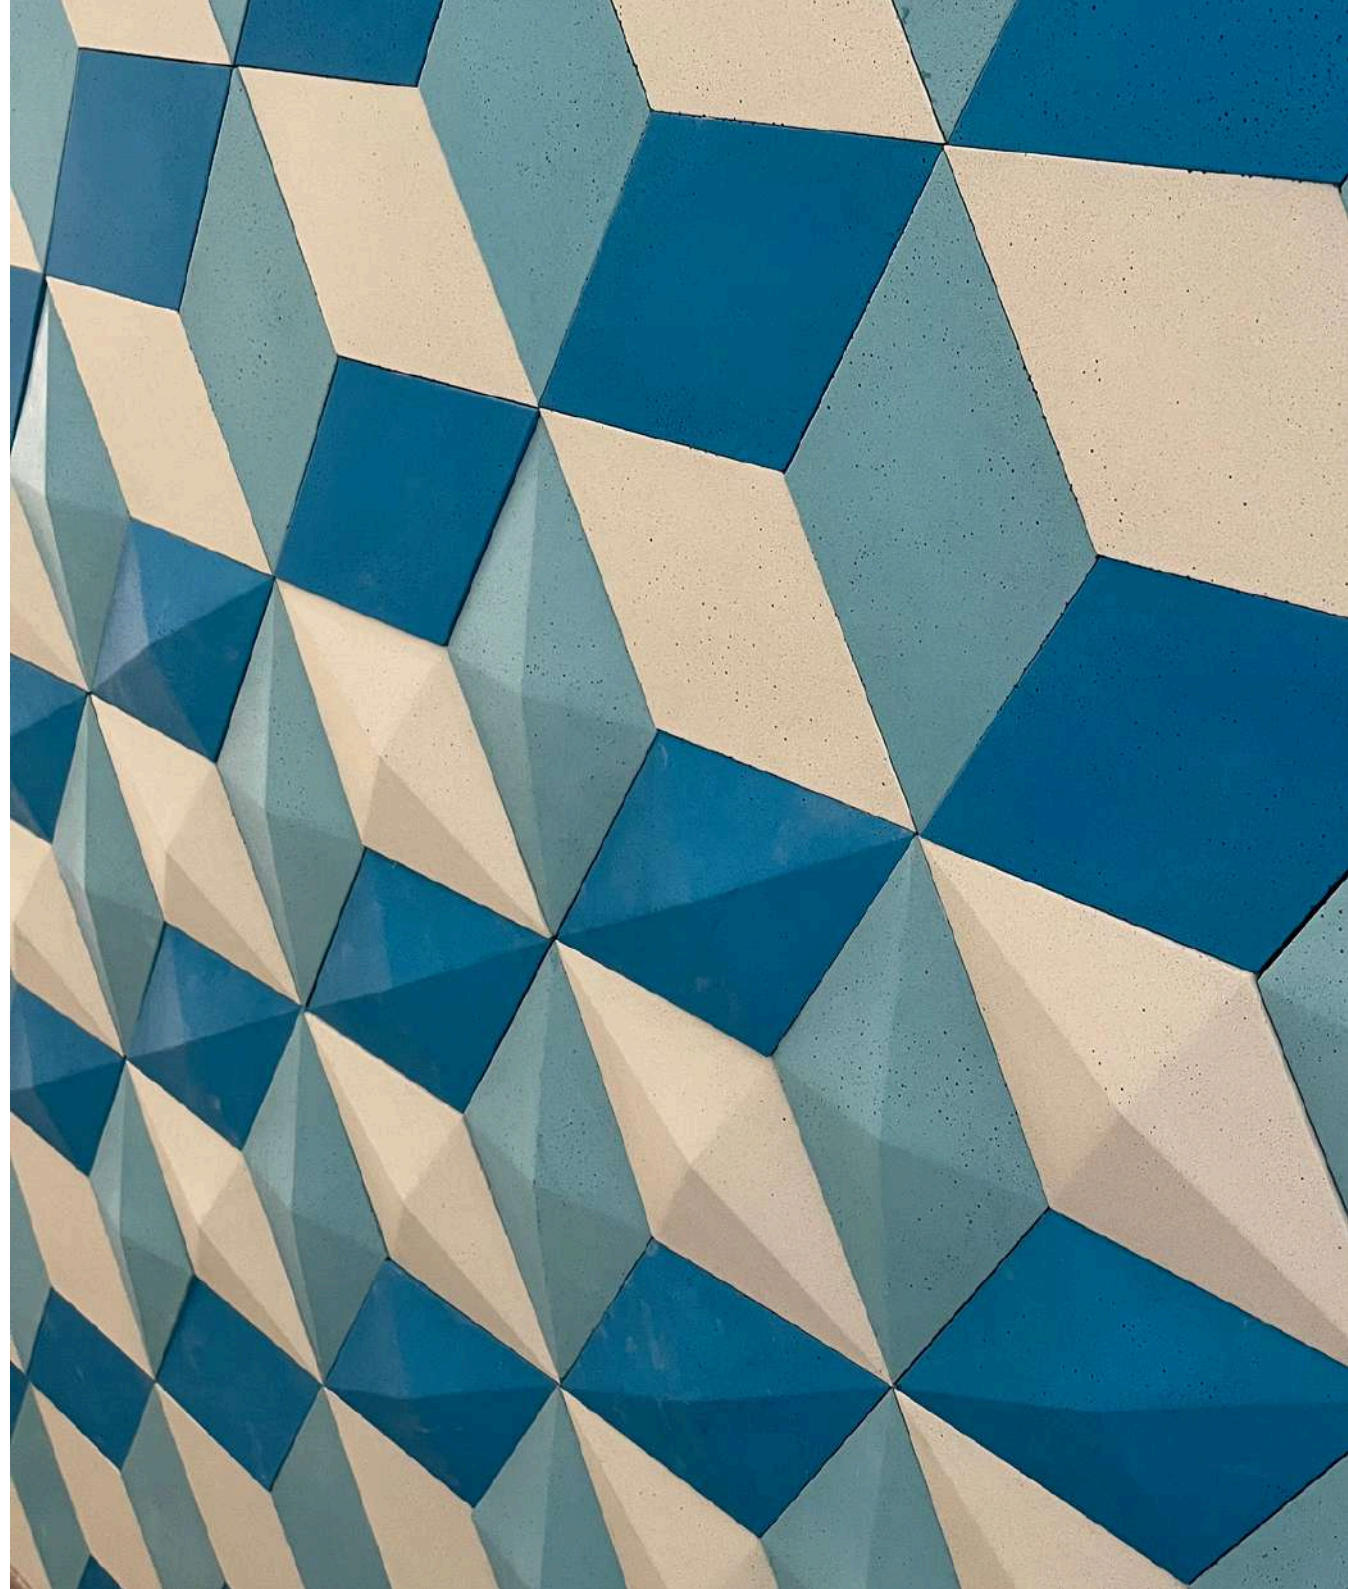

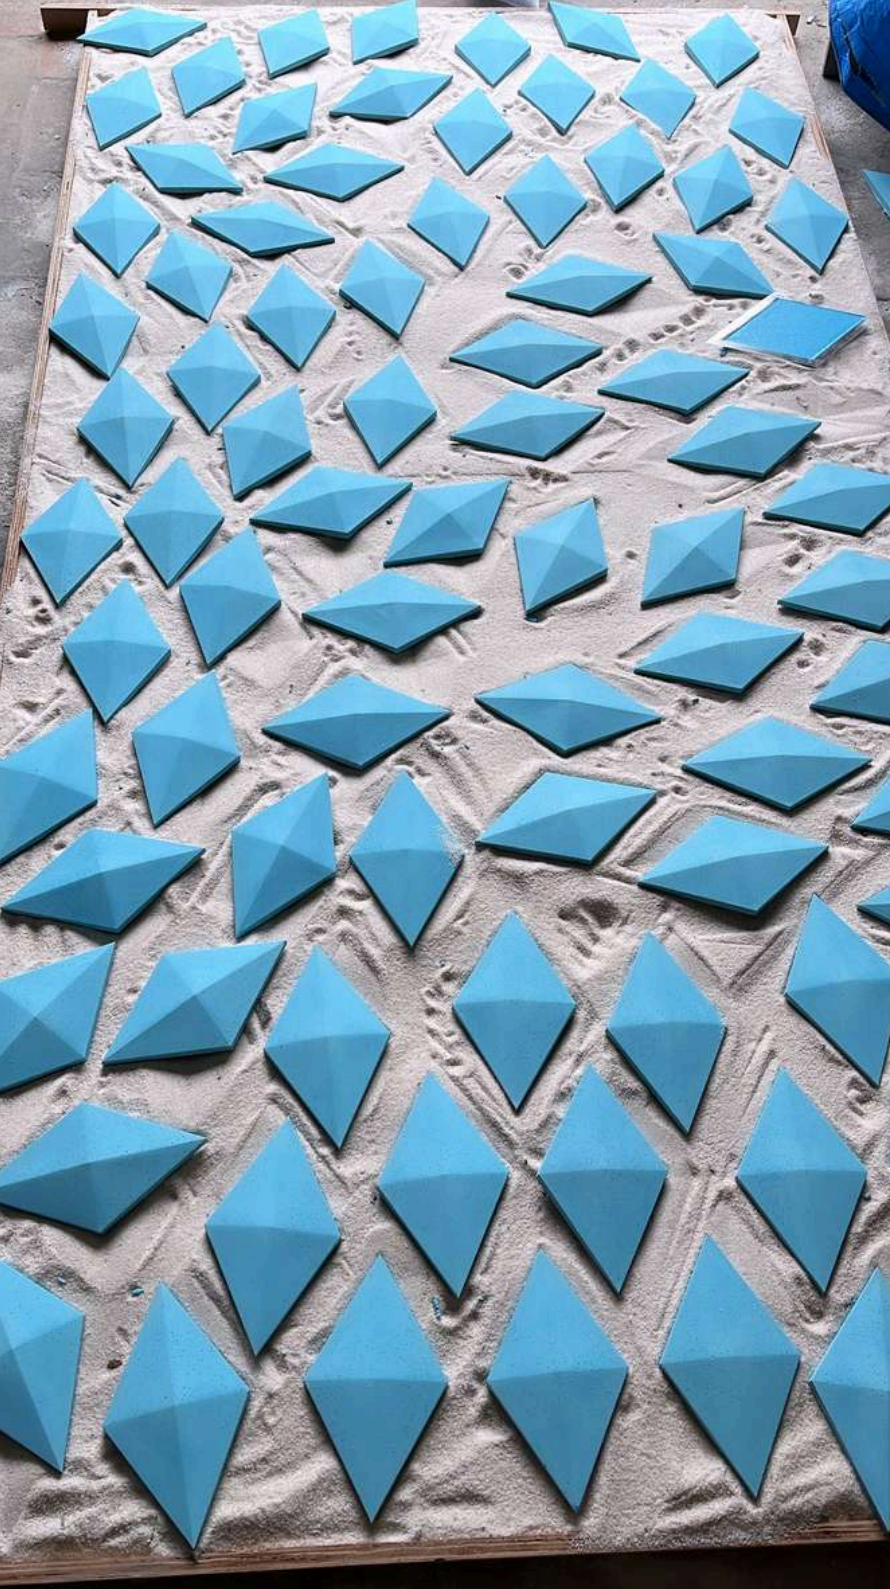

3D Tile : 232 mm x 134 mm x 23 mm (LBH)

Flat Tile : 232 mm x 134 mm x 10 mm (LBH)

RACRETE

FLOW

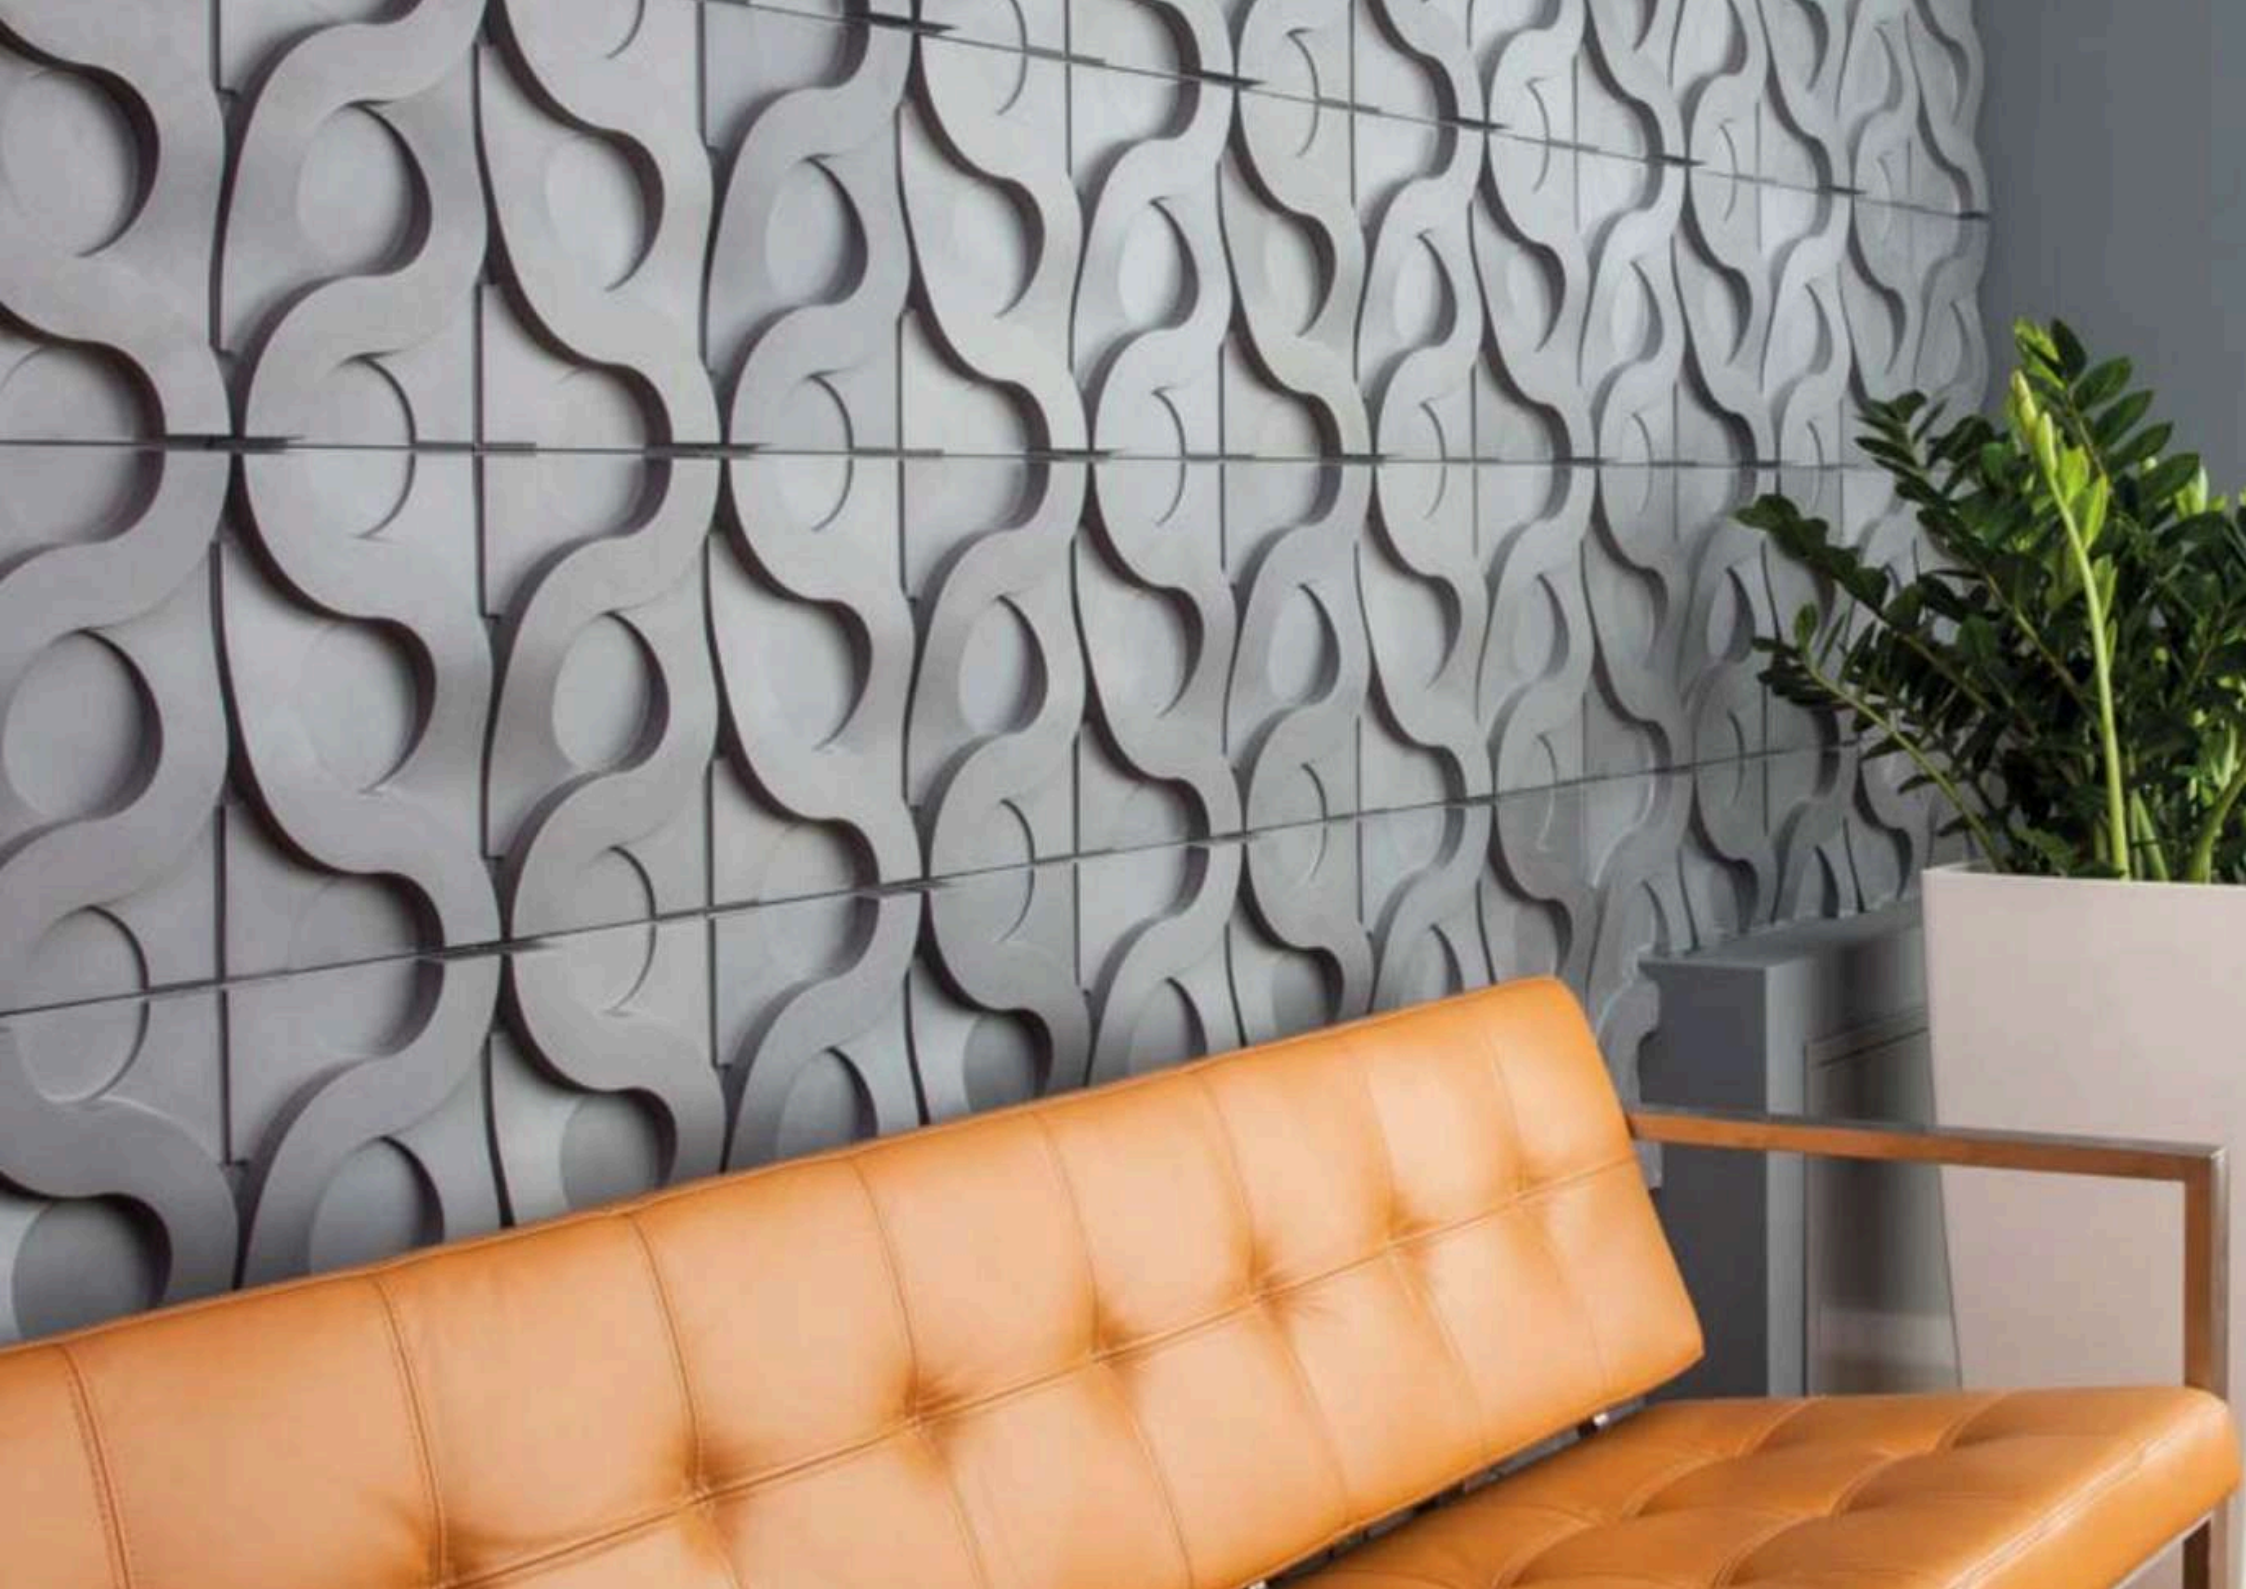

This design brings out the expression of flow and movement in a solid state. It is made up of two individual pieces designed as one which seamlessly blends together to create a sense of flowing on the wall surface. Give your walls a fluidic touch with this captivating design.

Coverage Area :

1 Sq. Ft. = ~ 1.25 tiles

Dimensions :

3D Tile : 330 mm x 220 mm x 33 mm (LBH)

CONVEX

This tile takes inspiration from 3 little leaves branching out from one stalk, creating a pure and modern visual conception. The playful yet simple lines and the 3D arrangement envision the image of a tidy field of clovers. Intricate design and high-quality materials create a visually striking and modern aesthetic.

Coverage Area :

1 Sq. Ft. = ~ 1.75 tiles

Dimensions :

3D Tile : 250 mm x 287 mm x 20 mm (LBH)

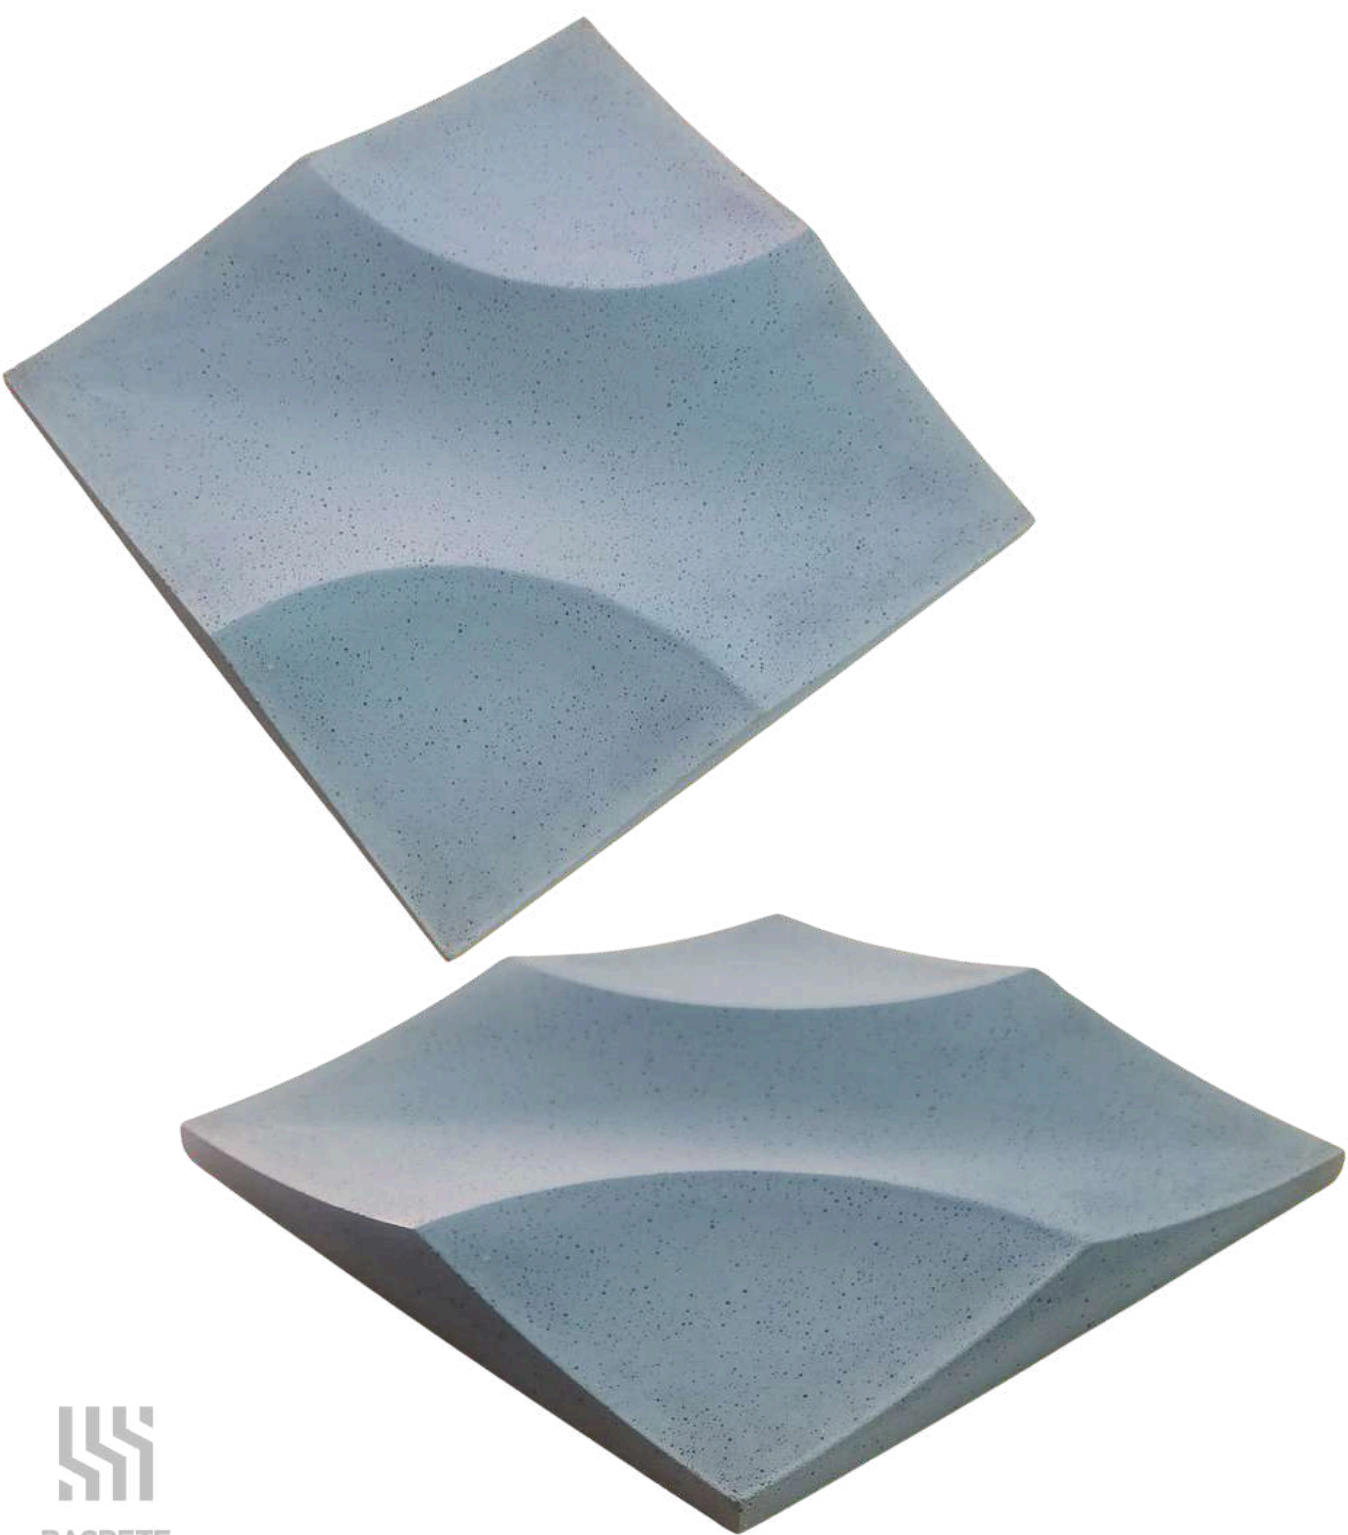

RIPPLE

The RIPPLE 3D concrete tile is an embodiment of graceful curvature and flow. Featuring a harmonious symmetrical design that effortlessly conveys a sense of seamless continuity. To fully capture the aesthetic beauty of its fluid contours light play with shadows magnifying its distinct three-dimensional character.

This versatile creation invites exploration through its ability to be rotated into limitless arrangements, giving rise to an array of curvaceous motifs.

Coverage Area :

1 Sq. Ft. = ~ 1.5 tiles

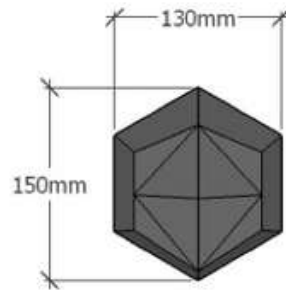

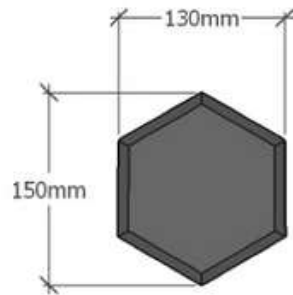

Dimensions :

3D Tile : 247 mm x 247 mm x 27 mm (LBH)

INSTALLATION

We recommend two types of bonding method:

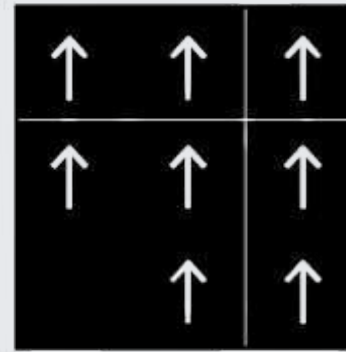

< 30 kg/m²

Cement based

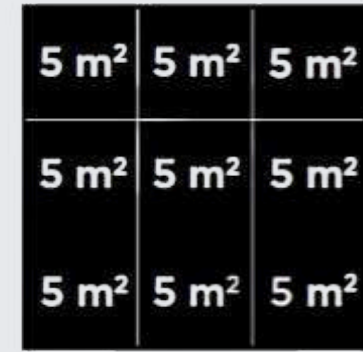

U1, U2, R1, E5

Polymer based

Always begin applying
from the bottom.

Large areas should be
processed in sections.

Our 3D concrete tiles are UV safe, water and stain resistant and are suitable for both indoor and outdoor areas.

Installation of SPARR tiles can be done using cement or polymer based adhesives and all tiles can be cut to fit any surface of any size.

We recommend using KERAKOLL Super Flex Eco adhesives for hassle free installation.
